Part 1 Business Operations and Performance

# 1. Group Structure and Operations

### 1.1 Policy and business overview

#### 1.1.1 Overview of the vision, objectives, goals and business strategies

#### Vision

The Company is committed to being the market leader in prestressed concrete products in the country through effective management by trained employees, capable of meeting customer needs and ensuring optimum satisfaction.

#### Objectives

- 1. Strengthening and developing production
- 2. Creating an efficient management system
- 3. Enhancing personnel's potential for quality
- 4. Developing the organization for sustainable growth

#### Goals

The Company continuously invests in the development of manufacturing processes, personnel potential, machine efficiency, technology, and product quality in order to produce prestressed concrete products of the highest standard of quality, strength, beauty, and durability under the trademark "STEC" and the slogan "Everyone is Value, Every Product is Quality." The Company also invests in providing excellent service under the slogan "Your satisfaction is our service goal."

#### **Business strategies**

- 1. Corporate growth strategy
- 2. Cost reduction strategy
- 3. Marketing development strategy
- 4. Employee potential development
- 5. Production process development

#### 1.1.2 Material changes and developments

#### Details regarding material changes and developments

| Year | Material changes and developments  |  |
|------|--|--|
| 2024 | Siam Steel Wire Company Limited - begins the production process and begin to recognize revenue |  |
|      | Investment in Wangconcrete Co.,Ltd. Surat Thani Province                                       |  |
|      | The Dissolution of subsidiary  |  |
|      | 1. Siam Technic Micropile Co.,Ltd.   |  |
|      | 2. Siam Technic Concrete (Saraburi) Co.,Ltd.   |  |
|      | 3. Siam Technic Concrete (Nakorn Rachasima) Co.,Ltd.   |  |
|      | 4. Siam Technic Concrete (Lumphun) Co.,Ltd.  |  |
|      | 5. Siam Steel Wire Trading Co.,Ltd.  |  |
| 2023 | The Establishment of New Subsidiary "Siam Steel Wire Tradnig Company Limited"                  |  |
| 2022 | The Establishment of New Subsidiary "Siam Steel Wire Company Limited"                          |  |
| 2021 | The Company has registered in Stock Exchange of Thailand                                       |  |

| Year | Material changes and developments   |
|------|---|
| 2021 |   |
|      | The Company acquired the factory in Chonburi province. (Chonburi 2) and Establishment of 9 new subsidiaries   |
| 2019 | The Company convert into public limited company   |
| 2018 | The Company has ceased operation in the general construction sector in the purposed of avoid conflict of interest between The Company and related company |
| 2017 | The Company established the factory in Nakhon Rachasima province  |
| 2016 | The Company established Spun pile factory. Change The Company name from Saraburi Technic Concrete to Siam Technic Concrete                                |
| 2008 | The Company acquired the factory in Chonburi province   |
| 2007 | The Company acquired the factory in Khon Khen province  |
| 2006 | The Company acquired the factory in Ubon Ratchathani province   |
| 2004 | The Company acquired the factory in Buriram province  |
| 2003 | The Company acquired the factory in Lamphun and Sukhothai provinces. Starting a construction contracting business   |
| 2001 | Established The Company The Company acquired the first factory in Don Phot District, Saraburi Province  |

# 1.1.3 Spending of the raised fund to serve the objectives declared in the registration statement for securities offering

Is there an issuance of equity securities or debt : No securities?

# 1.1.4 The obligations to which the company has committed in the registration statement, including the compliance with such obligations or conditions in the following years

Are there any issued securities with obligations or : No conditions?

#### 1.1.5 Company information

Company name : SIAM TECHNIC CONCRETE PUBLIC COMPANY LIMITED

Symbol : STECH

Address : No. 50 Soi Ngam Wong Wan 47, Intersection 20, Ngam Wong Wan Road,

Thungsonghong Sub-district, Laksi District

Province : Bangkok
Postcode : 10210

Business : Manufacturer and distributor of prestressed concrete products under the

trademark "STEC", such as piles and power poles including providing product transportation and piling service, and also providing construction  $\frac{1}{2}$ 

services specific to the company's core business.

Registration number : 0107562000254

Telephone : 0-2589-3888

Facsimile number : 0-2589-8911

Website : www.stec.co.th

 ${\it Email} \quad : \quad \quad {\it panchaporn.ch@stec.co.th (Invester \, Relation)}$

|---------------------------------|------|------|------|
| Share of profit (thousand baht) | 0.00 | 0.00 | 0.00 |

#### 1.2.2 Information on products and services

#### 1.2.2.1 Product/service information and business innovation development

#### 1. Prestressed concrete piles

Prestressed concrete piles play a critical role in the construction of foundations. The piles will be buried all the way down to the solid soil layer in order to withstand the weight of various construction structures. Then it is transported to the soil via friction between the pile's surface and the earth, as well as resistance at the pile's end. Prestressed concrete piles undergo a lengthy manufacturing process that involves PC wire and pouring quick-hardening cement concrete into the form. After the concrete has set, the high-tensile wire is severed. Compression is imparted to the concrete as the high tensile wire is pressed into it. This increases the bending strength of the concrete. Additionally, prestressed concrete mitigates the issue of pile cracking. The Company's piles are manufactured in accordance with the requirements and standards for industrial products (TIS) issued by the Thai Industrial Standards Institute (TISI).

#### Diagram of 1. Prestressed concrete piles

#### 2. Electric pole and prestressed concrete products used to assemble electric poles

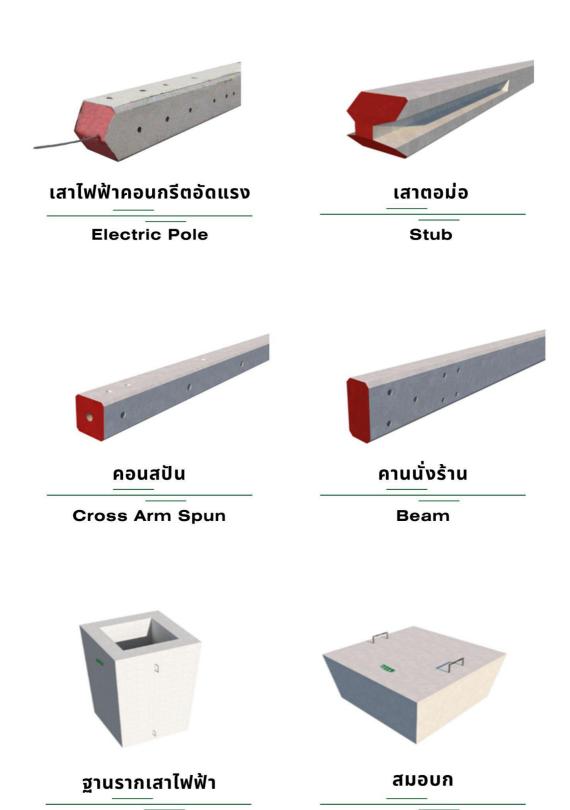

Electric pole and prestressed concrete products used to assemble electric poles are product categories that are employed by the

Electricity Authority in the construction and installation of high-voltage transmission lines. This group of products will be manufactured under the regulations and standards of state enterprises such as the Provincial Electricity Authority (PEA), the Metropolitan Electricity Authority (MEA) and the Electricity Generating Authority (EGAT). It is also certified for the quality management system according to international standards ISO 9001: 2015. The Company produces high-quality products that are acceptable to consumers and meet their needs. The products used to assemble each type of electric pole have the following distinct characteristics:

Diagram of 2. Electric pole and prestressed concrete products used to assemble electric poles

Source: Electrical Equipment Database Electrical Equipment Research Department, Research Division (www.dkttc.ac.th)

#### 3. Girder

The concrete girder is a component of the superstructure of the bridge. The concrete girder is a structural component that

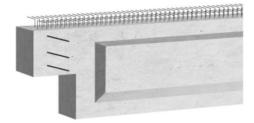

**Pole Foundation** 

**Anchor** 

supports the weight of the bridge and, in the future, the weight of the traffic on the bridge, which is expected to increase. As a result, the concrete girder must be sturdy, durable, and capable of withstanding extreme bending forces. The Company will manufacture concrete girders in accordance with the structural design, specifications, and customer needs specified by the Department of Highways (TSD), the Department of Rural Roads (TCC), and the Department of Public Works and Town and Country Planning (TCC).

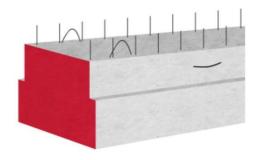

The plank girder, like the concrete girder, is a component of the upper bridge construction. It resembles a big concrete slab, approximately 5–12 meters in length, that is used to support concrete beams. This will be the section that bears the brunt of the traffic's weight immediately. Plank girder will be built in accordance with the specifications established by the Department of Highways (TSD), the Department of Rural Roads (TCC), and the Department of Public Works and Town and Country Planning (TCC).

Diagram of 3. Girder

#### Plank Girder

#### 4. Prestressed reinforced concrete piles by using centrifugal force (spun pile / round pile)

Spun piles are spherical hollow columns with prestressed steel wire frames inserted in the surrounding concrete. The concrete is spun at high speeds. The concrete will be compacted, increasing its strength, as concrete has a larger density than other types of concrete. As a result, spun piles can support far greater weight than other types of piles. In general, spun piles are utilized in large-scale building industries that demand strong foundation piles with a high load-bearing capacity to protect structures from damage caused by natural disasters and major accidents. As a result, spun piles are frequently employed in the construction of huge structures and/or constructions requiring a high level of security, such as airports, ports, highways, and major buildings. Spun piles are made pursuant to a license bearing the TIS industrial standard No. 398-2563 .

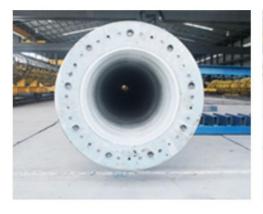

This form of piling can be accomplished in a variety of ways: with a simple crane (gantry crane), a hydraulic crane, and hydraulic static pile driver. However, depending on the area's requirements or limits, preboring may be combined with hammering. The Company's spun pile products are available in a variety of sizes, with diameters ranging from 300 to 800 millimeters and lengths up to 18 meters. They can be linked in up to three parts.

Diagram of 4. Prestressed reinforced concrete piles by using centrifugal force (spun pile / round pile)

# เสาเข็มสปัน / เสาเข็มกลม

### Spun pile / Round pile

#### 5. Other concrete products

Slak

The slab has the cross-sectional shape of a plank and is suited for basic building construction because it is more convenient, faster, and cost-effective to produce than the cast system floor. The slabs can always be stacked adjacent to one another. When concrete is poured on top of the face (structural topping), it forms a seamless composite with the final floor. The Company's slab will feature a solid plank cross-section, a width of 35 centimeters, a thickness of 5 centimeters, and a certain number of prestressed wires, and will be utilized for modest tasks with a span of up to 4.50 meters, such as general building construction. The company develops and sells slabs with the industrial standard mark TIS. 828-2546 in sizes ranging from 2–4 meters.

#### Gutter

It has the appearance of a precast concrete drainage gutter and is constructed of high-quality concrete. There are numerous sizes available to meet the needs of clients. At the moment, gutters are utilized in the construction industry, industrial plants, housing developments, private homes, government offices, and petrol stations, among other places.

#### Manhole

It appears to be a deep well. It is roughly 1.65 meters deep and constructed of reinforced concrete of the highest grade. There are a variety of sizes available in respect to the diameter of the sewer pipe. Nowadays, manholes are frequently used in the construction of buildings, highways, industrial facilities, housing developments, residential homes, government offices, and petrol stations, among other applications.

#### Precast beams

The precast beams serve as the horizontal components of the structure, which is primarily utilized for buildings or general housing and is constructed of high-quality reinforced or prestressed concrete. There are numerous sizes available to meet the needs of clients.

#### Precast column

Precast columns are employed as vertical components of the structure, which is the primary structural form utilized in buildings or general housing, and are constructed of high-quality reinforced or prestressed concrete. There are numerous sizes available to meet the needs of customers.

#### Diagram of 5. Other concrete products

#### 6. Other services

Transportation of various types of concrete products

By utilizing a tow truck and the Company's transport trailers, the Company provides transportation services that are appropriate for the nature of the goods. Additionally, there is collaboration with external transport companies that specialize in pile transportation to assist in the delivery of products to satisfy the needs of customers around the country within the required

time period.

#### Piling service

With advanced machinery, the Company provides hammering services for piling products and spinning piles. Piling is a fundamental principle in which the Company excels, as these services serve as the foundation for the strength of the construction work and serve to transfer the building's weight to the ground. As a result, without experience in pile driving and hammering piles with unequal depths, the structure will eventually collapse and break. Engineers and specialists will be on hand to assist and fix any issues that may develop during piling, ensuring that customers receive efficient and prompt service for pile drive services. The Company's pile driving machines are available in a variety of sizes to fit the size of the product and the nature of the appropriate area generated by the pile driving machines. There will be routine maintenance and a verification of the machines' readiness prior to each entry into service.

#### Pure Drive

Piling with gantry cranes, track cranes, rubber wheel cranes, and hydraulic cranes are all methods of hammering by raising the pendulum to a high position and then letting it fall on the pile head (Drop Hammer), which is currently widely used due to its low cost but has the disadvantage of generating a great deal of vibration.

#### Diagram of Pure Drive

#### Track-Mobile machine

- Can be used to drive piles vertically, such as
  - Building hammering
  - General hammering
- Able to be moved and installed quickly
- Able to work in soft soil areas

#### Mobile machine

- Can be used to drive piles vertically, such as
  - Building hammering
  - General hammering
- Able to be moved and installed quickly

#### Rig

- Can be used to drive piles vertically, such as
  - Building hammering
  - General hammering
- Able to be moved and installed quickly

#### Pre-bore

Pre-boring is used in situations where the soil layer is extremely hard and cannot be hammered or pressed normally without causing harm to the pile. This process involves drilling through the troublesome soil layer and then hammering or pressing to the desired depth. This method also addresses the issue of piles not being driven down to the desired depth.

#### Diagram of Pre-bore

#### Crane for pre-boring

- This is a pre-boring to avoid damage to surrounding buildings caused by pile driving vibration.
- This is a pre-boring to avoid damage to surrounding buildings caused by soil pressure from piling.
- This is a pre-boring to break through the dense soil layer. This will
  prevent harm to the pile from occurring during its drive through
  the solid

#### **Auger Press**

For spun piles, an auger press is employed. These cranes are equipped with a screw head that is used to dig the dirt inside the pile and to push the pile into the earth. Due to the fact that the dirt was removed during the pile installation, this significantly reduces vibration and soil movement into the surrounding region. This method is common in locations with soft soils, such as Bangkok and its environs, as well as construction sites adjacent to other structures.

### Diagram of Auger Press

# Hydraulic static pile driver with auger press installation system

- Can be used to drive vertical and angled piles.
- Provides high accuracy.
- Piling work in industrial estates that requires a high degree of precision and safety.

#### Pressing with Jack-in pile

It operates by anchoring the pile to the ground until it reaches the necessary weight capacity. The size of the pressed weight is determined by the safety ratio. As a result, this type of installation is vibration-free and eliminates the sound of piling. As a result, this form of pile construction is appropriate for urban locations with neighboring high-rise buildings.

#### Diagram of Pressing with Jack-in pile

#### Jack-in pile

Research and development policy in various areas, and details regarding innovation development in processes, products and/or services, or business models.

Research and development (R&D) policy : No

#### R&D expenses in the past 3 years

|  | 2022 | 2023 | 2024 |
|--|------|------|------|
| Research and development (R&D) expenses over the past 3 years (Million Baht) | 0.00 | 0.00 | 0.00 |

#### 1.2.2.2 Marketing policies of the major products or services during the preceding year

The Company has a policy to determine the prices of products and services as follows:

1) Product pricing: Competitive Price

Since the business of manufacturing and distributing prestressed concrete is highly competitive, the Company will set a competitive price using the method of cost plus by taking the cost of the product and added with the appropriate gross margin depending on the demand and supply in the market at that time. The price shall be competitive in the market and customers can control the construction budget of the project. The Company focuses on quality and service so that the projects should not cost customers higher than their set budgets.

#### 2) Shipping service pricing

The Company has a policy to offer prices that are suitable for customers, which are determined by the conditions of shipping

services. The important factors that are taken into consideration to determine a service charge are distance, fuel cost, and labor cost. The service fee rate can be adjusted according to the above factors, allowing the Company to reduce the risk from the impact of oil price fluctuations.

#### 3) Piling services pricing

The Company has a policy of offering prices depending on the difficulty of each job and the type of piling service. The Company shall have an expert engineer to provide suggestions and oversee the site to ensure an efficient pile driving process. The Company also has personnel with expertise and a variety of up-to-date machines such as jack-in pile, hydraulic crane, track wheel crane, rubber wheel crane, gantry cranes, etc.

#### The industry competition during the preceding year

The prestressed concrete pile business in 2024 clearly shows a recovery trend in the construction sector, both public and private sectors . Although the overall economy still has to deal with the impact of the COVID- 19 outbreak and the volatility of raw material prices such as steel and cement, important government infrastructure projects such as motorways and public transport development projects, as well as energy and electricity projects, have resumed their operations, resulting in a continuous increase in demand for prestressed concrete pile products. Meanwhile, the private sector has begun to recover by investing in real estate projects, industrial estates, and logistics systems, especially in the Eastern Economic Corridor ( EEC) , which is considered a hub for foreign investment that focuses on advanced technology and modern industries.

However, the overall market picture in 2024 will have challenges that cannot be overlooked, including higher production costs from raw material and energy prices, as well as delays in government budget disbursements that cause many projects to be implemented simultaneously at the same time, resulting in more intense competition in the market. Manufacturers who can control costs and adapt quickly will have an advantage in capturing market share.

From the perspective of executives and investors, the strategy for success in 2025 must therefore focus on both increasing production efficiency and systematically expanding the market.

First, investment in advanced technology and machinery will help reduce unit costs and increase production capacity, especially the development of subsidiaries to produce key raw materials such as high-tensile steel wire, which can reduce production costs by 20-30%. In addition, automatic quality control systems and continuous machinery maintenance will help make the production process more efficient and reduce potential losses.

Secondly, expanding the customer base is essential in 2025, especially by penetrating the market among large contractors and foreign companies investing in Thailand, including expanding the market in the EEC area, which is a region with high growth potential in the electric vehicle (EV) industry, petrochemicals, and electronics. Building strong business partnerships with project developers and government agencies will help access market opportunities effectively.

Thirdly, product differentiation and sustainability are important factors in building investor confidence. By offering environmentally friendly products and managing them according to ESG (Environmental, Social, Governance) principles, businesses can clearly demonstrate their social and environmental responsibility, which is what modern investors expect. Reducing energy consumption and installing solar rooftop systems in manufacturing plants are examples of commitment to long-term sustainability.

Finally, developing human resources and managing the organization to be transparent and efficient is the key to responding to the rapidly-emerging challenges. Executives should focus on training and developing the potential of employees at all levels, including using customer data management ( CRM) systems to collect and analyze customer needs in real time. Regular meetings with sales teams and factory teams will help make decisions and adjust strategies in a timely manner.

In conclusion, although 2024 will be a year full of cost and competition challenges, with a comprehensive strategy adjustment covering production, marketing, management and sustainability, the prestressed concrete pile business has the potential to grow and create added value for investors in 2025. Executives with vision and the ability to quickly adapt will be able to lead the business to long-term success and increase the attractiveness of this industry in the eyes of modern investors.

#### 1.2.2.3 Procurement of products or services

Production Process

- Step 1 Prepare steel formwork, Coat formwork with crude oil, Install stirrub and prestressed wire
- Step 2 Prestress the steelwire
- Step 3 Bind the steel forwork, Inspect and adjust the spacing of stirrub
- Step 4 Weight and inspact raw materials , Mix concrete , Perform slump test and prepare concrete test
- Step 5 Pour concrete mix continuous and tighten the concrete evenly
- Step 6 Weight and inspect raw materials , Mix concrete , Perform slump test and prepare concrete test cube
- Step 7 Stamp the STEC company brand and the certified TIS Industrial Standard mark
- Step 8 Perform concrete curing then test the compressive strength of the concrete cube
- Stec 9 Cut the steel wire and move the products to storage
- Step 10 Load finished products onto transport vehicle, Perform final inspection before product delivery

#### The company's production capacity

|   | Production capacity | Total utilization (Percent) |
|---|---------------------|-----------------------------|
| Saraburi (Donphut) ( cubic meter)       | 125,000.00          | 61.60                       |
| Sukhothai ( cubic meter)                | 24,000.00           | 60.40                       |
| Burirum ( cubic meter)                  | 18,500.00           | 64.70                       |
| Ubonratchathani ( cubic meter)          | 30,000.00           | 47.60                       |
| Khonkhen ( cubic meter)                 | 48,000.00           | 38.20                       |
| Lamphun ( cubic meter)                  | 20,000.00           | 40.00                       |
| Chonburi ( cubic meter)                 | 178,500.00          | 57.20                       |
| Saraburi (Phraphuttabat) ( cubic meter) | 34,000.00           | 78.90                       |
| All ( cubic meter)                      | 478,000.00          | 57.10                       |

The Company primarily manufactures prestressed concrete on a made-to-order basis, beginning with the mixing of raw materials and ending with the pouring of concrete onto the form, transportation, and installation of piles. Production to customer delivery takes roughly 2-3 weeks, depending on the quantity of items and the difficulty of pile driving.

#### Acquisition of raw materials or provision of service

The Company primarily manufactures prestressed concrete on a made-to-order basis, beginning with the mixing of raw materials and ending with the pouring of concrete onto the form, transportation, and installation of piles. Production to customer delivery takes roughly 2-3 weeks, depending on the quantity of items and the difficulty of pile driving.

Procurement of raw materials and products

The Company obtains the primary raw materials for the production of prestressed concrete products from a variety of manufacturers and distributors, the majority of whom are domestic. The following details are included.

- 1) The primary raw materials utilized in production are cement, stone, and sand, which are the primary components of concrete, as well as PC wire, round bars, and deformed bars for prestressed steel prior to pouring concrete. The Company will get raw materials from a variety of domestic producers and distributors, both major and small.
- 2) Additional raw materials and consumables, such as concrete admixtures, joints, flat steel, steel sheets, bolt heads, and wooden frames, are also available. Consumables will be purchased from domestic producers and distributors.

Raw Material Purchasing Policy To ensure efficient raw material procurement and to ensure that the Company receives raw materials that meet the quality and quantity specifications ordered at a reasonable price for the Company's primary raw materials, the Company will agree on a price in advance with a clear deadline to avoid the risk of raw material price fluctuation, and sufficient raw materials will be available. When purchasing raw materials, the Company will evaluate manufacturers based on the

quality of their products, their ability to deliver goods on time, and their reliability as a raw material provider.

Additionally, the Company has developed a strong and long-standing partnership with cement distributors and prestressed wire manufacturers in order to avoid raw material shortages.

#### Proportion of domestic and overseas procurement

| Countries | Name of raw material | Value (Baht)   |
|-----------|----------------------|----------------|
| Thailand  | Cement powder        | 175,064,967.17 |
| Thailand  | Wire                 | 271,020,327.10 |
| Thailand  | Steel                | 134,653,238.68 |
| Thailand  | Stone                | 94,030,796.41  |
| Thailand  | Sand                 | 45,051,305.40  |
| Thailand  | Concrete admixtures  | 17,591,139.94  |

### 1.2.2.4 Assets used in business undertaking

#### Core permanent assets

On 31 December 2024, the Company's fixed assets had a net book value of 1,324.24 million baht, as reflected in the financial statements, which can be summarized as follows:

(Unit : Million baht)

#### The appraisal price of core permanent assets

# 1.6 Dividend policy

## The dividend policy of the company

Each year, the Company pays dividends to stockholders equal to at least 40.00 percent of net profit after corporate income tax and legal reserve. The Company will consider dividend payments based on a variety of criteria in order to maximize shareholder value, and dividend payments must have only a minimal impact on the Company's usual operations. Dividend payments are subject to vary based on the Company's operating results and financial situation, liquidity, business expansion plans, future requirement and suitability, and other considerations deemed acceptable by the Board of Directors.

The shareholders' meeting must approve the Company's annual dividend payment, except for interim dividends, which the Board of Directors may approve when the Company is deemed to have sufficient profit to pay dividends without impairing operations and will report to the shareholders' meeting for acknowledgement at the following meeting.

#### The dividend policy of subsidiaries

# 2. Risk management

# 2.1 Risk management policy and plan

## Risk management policy and plan

Siam Technic Concrete Public Company Limited values risk management. The risk management committee, comprised of management and

independent directors, was formed to identify potential risks and devise strategies for dealing with them in order to manage risks in a methodical and manageable manner. At least once a year, the Risk Management Committee will convene to analyze risks and devise strategies for mitigating them. The Company's risk management policy states that risk management requires mutual understanding and accountability among personnel at all levels. This will result in future risk management that is more effective.

## 2.2 Risk factors

# 2.2.1 Risk that might affect the company's business, including environmental, social and corporate governance issues

Risk 1 Risks from new and existing entrepreneurs in the industry

Related risk topics : <u>Strategic Risk</u>

Competition risk

#### Risk characteristics

The current prestressed concrete manufacturing and distribution industry has many operators, ranging from small to large manufacturers, and new operators every year because there is still a demand for prestressed concrete products, which is in line with the growth of the real estate and infrastructure sectors. In addition, the prestressed concrete manufacturing and distribution business is a business that does not require a lot of investment and has a simple production process. In addition, the concrete products of each operator in the industry are similar to the Company's products, resulting in new operators in the prestressed concrete manufacturing and distribution business all the time, which makes the competition more intense.

#### Risk-related consequences

From the above risks that may result from new operators of prestressed concrete production and distribution in the market or existing operators, the Company has at risk of facing a fierce competitive environment from competitors because customers have more purchasing options and competitors may use price competition strategies to seize market share, which may cause the Company to adjust product prices down in line with market conditions and cause the Company to have less income from sales.

#### Risk management measures

the Company has a method for determining the selling price that takes into account a variety of factors, including the Company's ability to compete on a level playing field through the use of the cost plus margin method, which is based on the product's cost price plus the appropriate gross margin to use as a competitive price in the market, and continues to focus on selling products and effective services. Additionally, the Company employs a strategy of branch expansion in various regions, with a total of nine branches in the following areas: (1) Saraburi Province, Don Phut District, (2) Saraburi Province, Phra Phutthabat District, (3) Sukhothai Province, (4) Buriram Province, (5) Ubon Ratchathani Province, (6) Khon Kaen Province, (7) Lamphun Province, (8) Chonburi Province, (9) Nakhon Ratchasima and (10) Chonburi2 Nong Irun Sub-District. As a result of the Company's branch network stretched throughout multiple provinces, the Company benefits from a broader client base and lower expenditures, such as reduced transportation costs and time spent on transportation, among other things.

Additionally, the Company has convened a monthly executive meeting to closely monitor the production and distribution conditions of each branch's products in order to manage production capacity and raw material costs in the most appropriate and efficient manner possible. Additionally, the Company invests heavily in research and development of various technologies, such as plasma cutting machines, wire feeder machines, and sampling tools (sampling collector), in order to boost competitiveness, reduce production costs, simplify the manufacturing process, and lower the rate of production loss. All of which help contribute to the Company's market share growth. As a result of the Company's advantages and business policies, the aforementioned enables the Company to compete efficiently and sustainably in the industry.

#### Risk 2 Risks from changes in investment policies of the public and private sectors

Related risk topics : <u>Strategic Risk</u>

• Government policy

#### Risk characteristics

The Company's primary business is the manufacture and sale of prestressed concrete products, which are the primary raw material used in the construction of building and structure foundations. As a result, the Company's revenue may fluctuate depending on the state of the country's construction industry, changes in the government's infrastructure development plans, and investment in private building projects. Therefore, if Thailand's economy slows down and there is a change in the government's investment policy, for example, a policy change from the Eastern Economic Corridor (EEC) development project that focuses on investments in infrastructure and utilities to increase investment capacity and development of economic activities and facilities in the eastern region of Thailand, as a result, the demand for construction materials from the government sector will decrease and may result in a decrease in the demand for construction materials from the private sector due to the uncertainty of the government's plans and policies as well.

#### Risk-related consequences

The risk associated with such economic changes or change in government's investment policy could adversely affect the Company's operating results and result in inconsistency in the Company's sales volume and revenue.

#### Risk management measures

However, the Company can mitigate these risks by expanding its customer base to include a broader range of customers, such as contractors and government agencies, as well as direct sales to real estate developers, in order to diversify the risk of fewer construction projects in each industry, allowing the Company to have a more stable income base. Additionally, based on the management team's experience and expertise in conducting business, as well as the Company's past performance and positive relationship with each customer, the Company is confident that it will be able to retain existing customers and grow its customer base continuously in the future. Additionally, the Company has kept a close eye on the government sector's investment policies. The government sector was discovered to be continuing to bid on new projects that are expanding in response to the slow disbursement of the budget following the enactment of the Fiscal Year 2024 Budget Expenditure Act and policies from the Eastern Economic Corridor Development Project (EEC). As a result, demand for construction materials from local factories surged significantly. The Company intends to invest in the building of the Chonburi Plant Branch 2 in order to expand the Chonburi plant's production capacity in order to meet growing demand.

#### Risk 3 The risk of relying on a large customer who is a related company

Related risk topics : <u>Strategic Risk</u>

• Reliance on large customers or few customers

#### Risk characteristics

The Company has one significant customer who is a related company S-TEC Civil & Construction CO.,LTD. ("CIVIL"), which is held 100% by Ruam chai kit Company Limited ("RCK"). As of 31 December 2024, RCK is the Company's largest shareholder, holding 49.24 percent of the Company's total issued and paid-up shares. CIVIL currently operates a construction business from both the public and private sectors as the main contractor via the auction method of tendering and negotiating with other contractors through joint ventures or consortiums. The Company supplies pre-stressed concrete products to CIVIL for use in the Company's construction activity. The Company's revenue from sales and services to CIVIL will be 88.48 million baht in 2022 and 94.17 million baht in 2023, respectively. They account for 4.44 percent and 5.10 percent, respectively, of the Company's total sales and service revenue.

#### Risk-related consequences

If a CIVIL construction project encounters uncertainty conditions such as a reduction in the scope of the project or CIVIL being cancelled by a government agency, etc., the Company's sales and service revenue may experience instability.

#### Risk management measures

However, the Company derives a modest amount of its revenue from sales and services to CIVIL and does not rely solely on CIVIL revenue. Customers of the Company can be grouped into three categories: project owners, contractors, and government enterprises or government customers. The Company has a loyal following of repeat customers, many of whom are construction companies listed on the Thai Stock Exchange, such as CH-Karnchang Public Company Limited Additionally, the Company has regular customers that are government agencies, such as the Provincial Electricity Authority, who do business with and trust the Company for a long period of time. The Company has used pre-stressed concrete products, demonstrating the Company's product quality and the confidence and trust of its customers in the Company. The Company employs sales personnel who are responsible for acquiring new customers and routinely following up on prestressed concrete procurement projects in both the public and private sectors. Throughout the past business period, the Company maintains a positive relationship with all customers, large and small, by producing high-quality items at affordable and competitive pricing, with on-time delivery, and by doing follow-up on dispersed products. This enables the organization to retain existing customers while also acquiring new ones.

Additionally, the Company has policies and operating procedures in place to ensure that transactions between the Company, CIVIL, and other connected persons are transparent and free of conflict of interest. The Company has a strategy for demonstrating the fairness of its prices and terms of selling items and delivering services to linked individuals by demonstrating

#### Risk 4 Risk of impact from construction delays or interruptions

Related risk topics : <u>Operational Risk</u>

• Delays in the development of future projects

#### Risk characteristics

the Company also operates a construction business, it is limited to projects related to its primary business and construction

projects for which the Company has experience and expertise, such as the installation of 115 kV high voltage transmission lines and design work, procurement and installation of fiber optic cables. As a result, there is a risk of construction delays or interruptions due to a variety of events that may affect, such as the COVID-19 epidemic situation, natural disasters, etc.

#### Risk-related consequences

the Company may be unable to complete the work in the timeframe specified in the contract and may incur fees, such as penalties for late delivery of work and incremental costs, etc.

#### Risk management measures

This type of construction work is what the Company excels, particularly in the installation of 115 kV high-voltage transmission lines. The Company manufactures the majority of the materials utilized in such projects, including foundations, electric poles, and cross arm spun, which enable the Company to plan production and work schedules in order to manage the construction effectively and to alter production and work schedules swiftly in response to changing circumstances, hence lowering the chance of various incidents occurring.

#### Risk 5 Risk from dependence on suppliers

Related risk topics : <u>Strategic Risk</u>

• Reliance on large partners / distributors or few partners / distributors

#### Risk characteristics

High tensile steel wire and cement are the primary basic materials utilized in the manufacture of prestressed concrete, the Company purchases raw materials such as cement, PC wire, stone, sand, and steel from a variety of sources, with no single supplier accounting for more than 30.00 percent of total raw material purchases each year.

#### Risk-related consequences

If a major raw material supplier is unable to supply the Company with raw materials in the quantities agreed upon or on acceptable commercial terms, the Company may be unable to get raw materials from alternative sources in time to complete the production plan as specified by the customer.

#### Risk management measures

However, the Company can mitigate the risks of such accidents by carefully evaluating the quality, pricing, and raw material manufacturing facilities of the Company's primary raw material suppliers. Whether it is cement, wire, or steel, they are well-known and reputable large producers and distributors that has never met a shortage of raw materials to provide the Company. This enables the Company to purchase raw materials from alternative suppliers, minimizing the impact on the Company's production plans in the event that a raw material supplier is unable or unable to furnish raw materials to the Company on the appropriate terms and conditions agreed upon by the Company.

#### Risk 6 Risk of inaccurate cost estimates of construction project.

Related risk topics : <u>Operational Risk</u>

• Delays in the development of future projects

#### Risk characteristics

In construction work, there may be various factors that cause the actual costs to be higher than the estimated costs planned due to special events or force majeure such as unrest, floods or other reasons that result in the Company being unable to perform its work substantially.

#### Risk-related consequences

If such risks occur, it may cause the Company's construction project to suffer losses due to such higher costs.

#### Risk management measures

the Company currently considers only 2 types of construction work, namely the installation of high voltage transmission lines and the design, procurement, and installation of fiber optic cables, which allow for more accurate cost estimation. The following are the critical processes.

- (1) The Company evaluated the project's cost of construction, including the quantity of materials and the preliminary pricing, in order to propose the price that will be utilized for the preliminary tender by considering the following factors:
- The work's difficulty, the difficulty of procuring raw materials and manpower
- The cost to be incurred and the mark up compared to the average price of the employer
- The duration of the project implementation set by the employer- The Company's Potential in Construction Operations
- Cash flow adequacy during operation

(2) Measures for the management of construction projects to control the cost of services

- Prepare a summary of the actual project costs at the conclusion of each month.
- Construction cost control involves comparing the project's progress report to actual spending to ensureconsistency.
- To determine the completion of the work reported by the project agency, a random check of the actual construction work conducted on the project is made against the project progress report. If there is a disparity greater than 5 percent, it must be reported to the project manager for investigation and clarification, with approval from the construction manager.

Whenever there is a reason for excessive project costs without resulting in performance or damage to the project's profit margin, the Construction Department must review and amend cost estimates before submitting them to the accounting department of the Company. At each Board of Directors meeting, a monthly report on each project is presented, which might help mitigate such risks

#### Risk 7 Risk of malfunction or damage to industrial machinery or equipment

Related risk topics : <u>Operational Risk</u>

• Other : Risk of malfunction or damage to industrial machinery or equipment

#### Risk characteristics

ue to the fact that the Company's machinery and equipment that are used to produce prestressed concrete and pile driving are necessary tools for the production of products and services,

#### Risk-related consequences

this may result in the Company's production rate and service capability being behind schedule, resulting in delays and inability to deliver products on time, which will have a direct impact on the Company's overall reliability.

#### Risk management measures

However, the Company conducts routine inspections and maintenance on machinery and equipment, and materials or spare parts are prepared in advance in case of a failure. Additionally, if a machine malfunctions during work and the Company is unable to produce products in time to deliver to customers, the Company will have a contingency plan in place by bringing products from other branches of the Company to deliver to customers first in order to meet the delivery schedule and allow customers to proceed with the construction as planned

#### Risk 8 Risk from fluctuation in raw material prices

Related risk topics : <u>Operational Risk</u>

 $\bullet$  Shortage or fluctuation in pricing of raw materials or productive resources

#### Risk characteristics

Due to the fact that the primary raw materials used to manufacture the Company's products, such as high tensile steel wire (PC Wire/PC Stand), deformed steel, round bar, and cement, fluctuate in price each year in response to changes in global market prices, such as steel and cement prices,

#### Risk-related consequences

the cost of production may fluctuate each year in according to the price of such raw materials.

#### Risk management measures

However, the Company's management has consistently monitored and regulated raw material costs, including the amount of raw material stockpiles and raw material purchases, in order to mitigate the risk of raw material price variations. Additionally, for high tensile steel wire goods, which are subject to greater price volatility than other raw materials, the Company will utilize the pre-ordering technique at the negotiated price. This will enable the Company to more effectively manage its manufacturing costs and mitigate the risk of raw material price volatility.

#### Risk 9 Risk from dependence on key management

Related risk topics : Operational Risk

• Reliance on employees in key positions

#### Risk characteristics

Mr. Watchai Mongkolsrisawad is currently a Senior executive of the Company with extensive knowledge and experience in the business, particularly in engineering in terms of plant construction, selection, and procurement of efficient machinery, branch expansion planning, and investment strategies, as well as building credibility and positive relationships with partners.

#### Risk-related consequences

As a result, future changes in the Company's personnel may have an effect on the Company's business operations.

#### Risk management measures

However, the Company is aware of the aforementioned risks and has established a well-established management system for factories, machinery, and various production processes, placing a premium on competent personnel selection and ongoing support and development of employee training conducted both internally and externally. Additionally, the Company has a clear organizational structure that segregates the duties and responsibilities of each department in order to decentralize powers and responsibilities as necessary, and the Company has a succession planning policy in place to allow for systematic personnel development and to be prepared to act on behalf of the Company's key executives in order to mitigate the risk of reliance on key executives having a negative impact on the Company's business.

#### Risk 10 The risk of a shortage of skilled workers

Related risk topics : Operational Risk

• Shortage or reliance on skilled workers

#### Risk characteristics

The manufacturing and installation of many types of prestressed concrete products require highly skilled, knowledgeable, and experienced laborers. This enables the work process to be seamless, punctual, safe, and efficient, resulting in customer satisfaction following the receipt of products or services. Additionally, it will assist in reducing production losses. As a result, the Company has always placed a high value on the provision of high-quality workforce in its manufacturing processes and services. There may be a shortage of skilled labor if the Company is unable to recruit additional staff in response to increased branch count or production volume, or if the recruitment industry is competitive

#### Risk-related consequences

resulting in insufficient staff to meet demand and causing goods to be delivered later than the specified period

#### Risk management measures

However, the Company has a plan in place to mitigate such risks by hiring personnel who are suited to the operations in diverse branches. The Company has altered its compensation structure to reflect market realities in order to compete with other businesses in the same industry; moreover, the Company provides ongoing training and education to its employees and contractors, which incentivizes employees to reduce turnover and makes recruiting new employees easier.

#### Risk 11 Risks from Interest Rate Volatility

Related risk topics : <u>Financial Risk</u>

 $\bullet$  Fluctuation in exchange rates, interest rates, or the inflation rate

#### Risk characteristics

The Company has both short-term and long-term loans from domestic financial institutions to be used as working capital and investment. Most of the loans are floating interest rates, therefore, the fluctuations of interest rates will have a significant impact on the company's financial costs.

#### Risk-related consequences

the fluctuations of interest rates will have a significant impact on the company's financial costs.

#### Risk management measures

Although the current interest rates have started to increase since the end of 2022, however, the company could maintain the interest coverage ratio in 2023 - 2024 at a level of 10.64 times and xx.xx times which was considered high interest payment ability. This demonstrates that the company will certainly be able to cope with fluctuating interest rates in the future.

## Risk 12 Risk of not receiving payments or receiving late payments

Related risk topics : Financial Risk

• Default on payment or exchange of goods

#### Risk characteristics

Because the Company's primary business is manufacturing and distributing concrete products, as well as providing transportation and pile driving services to customers, the Company will establish a payment period or credit terms with each customer ranging from approximately 30 to 90 days, depending on the terms agreed upon between the Company and the customer. Customers can be divided into two categories: (1) trade account receivables that are less than 3 months overdue, the majority of which are due to overdue from the process of withdrawing payments for goods and services by customers, which may result in a delay in payment of goods and services beyond the repayment term, and (2) trade account receivables that are more than 3 months overdue, the majority of which are due to overdue due to problems in customers' financial status and poor liquidity, such as customers who are construction contractors not able to deliver work on schedule and not receive construction payments from project developers or

project owners, resulting in insufficient working capital to pay for the Company's products and services.

#### Risk-related consequences

If the debtor defaults on the payment or makes a late payment beyond the specified deadline, it may affect the cash flow for the Company's operations.

#### Risk management measures

However, the Company has created debtor management manuals in order to equip relevant departments and staff with formal and precise instructions and processes. Furthermore, The Company has established rules for reducing the risk of default of trade accounts receivable by an examination of the information, history, operating performance, and financial health of all new clients, including a deposit to mitigate the consequences of default.

#### 2.2.2 Risk to securities holders

Are there any risk factors affecting securities holders? : Yes

#### Risk 1 Securities Holder Investment Risks

Related risk topics : Risk to Securities Holder

• Other: Securities Holder Investment Risks

#### Risk characteristics

Investment in the Company's securities is similar to investment in other securities on the Stock Exchange of Thailand that involves risks. If the Company's performance is not as expected or if it incurs debt or incurs a large amount of losses, it may result in risks to the investment of securities holders.

#### Risk-related consequences

If the Company's performance is not as expected, it may result in risks to the investment of securities holders.

#### Risk management measures

On 31 December, 2024, the Company's total assets were 3,201.66 million baht, compared to its total liabilities of 1,087.70 million baht, indicating that the Company's assets exceeded its liabilities. It has a total of 361.04 million baht in unappropriated retained earnings and a liquidity ratio of 0.75 times current assets to current liabilities. The debt-to-equity ratio (D/E Ratio)(total debt-to-equity ratio) is 1.18 times. Return on Equity (Proportion of net profit to average shareholders' equity) is 9.59 percent, indicating that the risk of investors losing their entire investment is low, according to the Company

# 2.2.3 Risk to securities holders from investing in foreign securities (applicable to only foreign companies)

Are there any risk factors affecting securities holders : No from investing in foreign securities?

# 3. Sustainable Development

## 3.1 Policy and goals of sustainable management

## Sustainability Policy

Sustainability Policy : Yes

The Company is conscious of the importance of sustainable growth. Not only is the company focused on increasing its financial performance, but also on increasing earnings while managing risk, taking into account both positive and negative repercussions on its stakeholders. Under good corporate governance, there are all stakeholder groups associated with the organization, including shareholders, employees, customers, partners, communities, society, and the environment. The Company has policies related to sustainability management as follows:

- Good Corporate Governance Policy
- Corporate Social Responsibility Policy
- Business Ethics
- Anti-Corruption Policy
- Risk Policy

Reference link for sustainability policy : https://www.stec.co.th/stech

#### Sustainability management goals

Does the company set sustainability management goals : No

## Review of policy and/or goals of sustainable management over the past year

Has the company reviewed the policy and/or goals of : Yes

sustainable management over the past year

Has the company changed and developed the policy and/or  $\,\,$  : No

goals of sustainable management over the past year

## 3.2 Management of impacts on stakeholders in the business value chain

#### 3.2.1 Business value chain

The business value chain is a tool that helps analyze activities that create added value for the business's products or services. It is divided into 2 main parts: Primary Activities and Support Activities.

1. Primary Activities: are activities directly related to the production and delivery of products or services, consisting of:

Production: The production process of products or services, showing production in the factory.

Transportation: Transporting products from the production site to customers or other related locations.

Installation: Installing products for customers (may be machines or equipment that need to be installed).

After-sales Service: Providing after-sales service to customers, such as maintenance, consulting, etc.

2. Support Activities: are activities that support the primary activities to proceed smoothly, consisting of:

Procurement: Procurement of raw materials or products necessary for production.

Information Technology: Using technology to manage data and support business operations.

Human Resource Management: Managing the organization's personnel

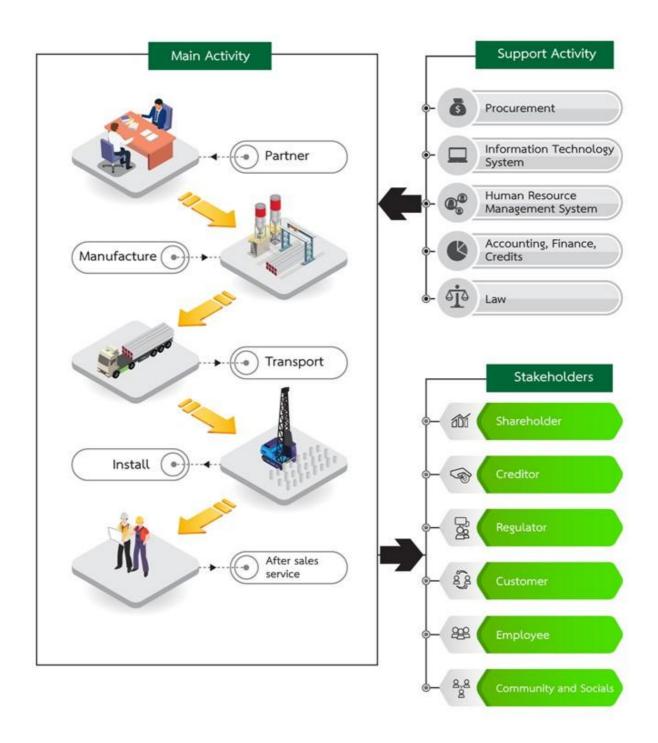

Accounting, Finance, Credit: Managing the financial aspects of a business

Legal: Managing legal aspects related to a business

In addition, there are suppliers, who provide raw materials or products to a business, and stakeholders, who are groups affected by a business, such as shareholders, creditors, regulators, customers, employees, communities, and society.

Overall, the value chain shows the processes of a business from start to finish, starting from the procurement of raw materials, production, transportation, installation, to after-sales service, where every step is important and affects the success of a business.

## Business value chain diagram

3.2.2 Analysis of stakeholders in the business value chain

Details of stakeholder analysis in the business value chain

| Group of stakeholders | Stakeholders' expectations  | Responses to stakeholder expectations  | Channels for engagement and communication                               |

# 4. Management Discussion and Analysis (MD&A)

## 4.1 Operation, financial condition and material changes

## Operational overview

Overview of operations in 2024 (Consolidated financial statements)

In 2024, the Company was able to continuously sell products to both government and private sector customers, especially large-scale projects, despite the intense competition. In 2024, the Company began production and recognized revenue from the high-tensile steel wire manufacturing and distribution business of Siam Steel Wire Co., Ltd., a subsidiary of the Company, resulting in a significant increase in revenue for the Company, resulting in total revenue of 2,082.36 million baht, an increase of 112.93 million baht or 5.73 percent from the previous year, with a gross profit of 421.95 million baht or 20.26 percent, and a net profit of 117.31 million baht or 5.60 percent.

Overview of operations in 2024 (Separate financial statements)

In 2024, the prestressed concrete product business experienced intense competition, even though the Company has continuously tried to increase distribution channels and expand the market to new customer groups. But the total income is still lower than in 2023. In 2024, the company had a total income of 1,903.13 baht, a decrease of 76.79 million baht or 3.88 percent from the previous year. However, with better cost management, the company had a gross profit of 406.52 million baht, or 21.36 percent, and

a net profit of 141.12 million baht or 7.35 percent.

## Analysis on the operation and financial condition

## Operating results and profitability

#### Revenue from sales and services

During 2022-2024, the company had revenue from sales and services in the amount of 2,000.22 million baht, 1,791.57 million baht and 2,039.54 million baht respectively which decreased from 2022 by 10.43% and increased from 2023 by 13.84%. This increase was due to a higher volume of work delivered compared to the same period of the previous year, driven by existing orders on hand.

## Revenue from construction projects

During 2022–2024, the Company had revenue earned by construction business in the amount of 116.82 million baht, 177.86 million baht and 42.82 million baht respectively, or equivalent to 5.50%, 8.89% and 2.04% of the total revenue of the company, respectively.

For 2022, the company had recognized revenue from the continuous 115 kV Transmission Line Construction project and also the new project acquired this year, that caused the revenue from construction projects highly increased from last year.

For the year 2023, the company has recognized revenue from 115kV Sawankhalok High Voltage Power Station (Electricity Generating Authority of Thailand)- Highway No. 101, km 102+052 in Sukhothai province, 115kV Transmission Line Construction Project at Nong Han High Voltage Substation (Electricity Generating Authority of Thailand), Udon Thani province – Sawang Daen Din Power Station Sakon Nakhon Province, and 115 kV Transmission Line Construction Project, Highway No. 3, Kilometer No. 397+750 (entrance to Wang

Krachae Subdistrict Administrative Organization Road) to Laem Ngob Power Station, Trat Province. As a result, in 2023 the company recognized income from construction project quite high compared to the previous 2 years.

For the year 2024, revenue recognition from the construction projects of the 115 kV transmission line system at the Sawankhalok High Voltage Substation (Electricity Generating Authority of Thailand) – Highway No. 101 at Kilometer 102+052, Sukhothai Province, the 115 kV transmission line system at the Nong Han Substation (Electricity Generating Authority of Thailand), Udon Thani Province – Sawang Daen Din Substation, Sakon Nakhon Province, were completed by the second quarter of 2024. Additionally, the construction of the 115 kV transmission line system on Highway No. 3, at Kilometer 397+750 (entrance to the Wang Kra Chao Subdistrict Administrative Organization Road) to the Laem Ngob Substation, Trat Province, were completed by the fourth quarter of 2024. As a result, the company will recognize a decrease in revenue from these projects completion compared to the previous two years.

#### Other income

Other income of the company consists of interest income, selling scrap iron, profit from asset sales, and income from rental. In year 2022–2024, the company had other income of 8.44 million baht, 32.13 million baht and 13.79 million baht, respectively, equal to 0.40%, 1.61% and 0.66% of the company's total revenue, respectively.

For 2023, the Company's other income increased by 23.69 million baht or 280.69% which was mainly from a revenue recognized from provision reversal and appeals for refund of fines for late delivery from installation of fiber optic cables and underground transmission lines.

For the year 2024, the company had other income decreasing by 18.34 million baht, or a decrease of 57.08% compared to the previous year, due to the recognition of income from the appeal of late delivery penalties for the cable design, procurement, and installation project for optical fiber cables, and the reversal of estimated liabilities in 2023.

#### Cost of sales and services

Year 2022–2024, the company has cost of sales and services in the amount of 1,690.09 million baht, 1,452.00 million baht and 1,614.34 million baht which was equal to 84.50%, 81.05% and 79.15% of the total revenues from sales and services, respectively. The proportion of the cost of sales for 2023 and 2024 decreased compared to the previous years, respectively, due to more efficient cost management of the company.

#### Construction projects cost

Year 2022-2024, the company has project costs 110.28 million baht, 159.62 million baht and 46.07 million baht respectively, equal to 94.40%, 89.74% and 107.59% respectively.

In 2022, there is a gross profit margin from the previous project work that was started since 2021, which was the construction of the 115 kV transmission line, Sakon Nakhon 2 Electricity Station, Sakon Nakhon Province - Si Songkhram Electricity Station.

Nakhon Phanom Province. In additional, the company has got the new construction project which was the construction of the 115 KV transmission line at Sawankhalok High Voltage Power Station (Electricity Generating Authority of Thailand)-Highway No. 101 Km. 102+052 in Sukhothai province.

For 2023, the gross profit margin from the construction of the 115 KV transmission line at Sawankhalok High Voltage Power Station (Electricity Generating Authority of Thailand)-Highway No. 101 Km. 102+052 in Sukhothai province, Construction of 115 KV Transmission Line at Nong Han High Voltage Station (Electricity Generating Authority of Thailand) Udon Thani – Sawang Daen Din Power Station, Sakon Nakhon Province and 115 KV Transmission Line Construction Project at Highway No. 3 Km. 397+750 (Entrance to Wang Krachae Subdistrict Administration Organization Road) Arrive at Laem Ngop Power Station, Trat Province.

For the year 2024, there was a loss from the project of constructing the 115 KV Transmission Line Construction Project at Highway No. 3 Km. 397+750 (Entrance to Wang Krachae Subdistrict Administration Organization Road) Arrive at Laem Ngop Power Station, Trat Province.

#### Distribution costs

The company had the distribution costs during 2022–2024 in the amount of 23.50 million baht, 24.52 million baht and 29.35 million baht, respectively. The company's main distribution costs were employee benefits expenses.

In 2023, the Company's distribution costs increased 1.02 million baht or 4.34%, mostly comes from marketing expenses. For 2024, the distribution costs had increased about 4.83 million baht or equivalent to 19.71%, mostly from employee benefit expenses.

#### Administrative expenses

The Company had administrative expenses during 2022-2024 in the amount of 158.09 million baht, 179.19 million baht and 190.12 million baht, respectively. The administrative expenses can be classified into employee benefit expenses, depreciation and amortization, bad debts and doubtful accounts receivable, and other expenses.

For 2023, the Company's administrative expenses increased by 21.10 million baht or an increase of 13.35% compared to 2022, mainly due to an increase in bad debts and doubtful accounts receivable from some customers who have been affected by delays in payments from the government sector.

For the year 2024, the company had an increase in administrative expenses of 10.93 million baht, or an increase of 6.10% compared to 2023. Administrative expenses accounted for 9.07% of total revenue, which is a proportion similar to the previous year.

#### Financial cost

The company had financial costs during 2022–2024 in the amount of 19.89 million baht, 28.94 million baht and 53.67 million baht, respectively. The financial costs of the Company can be classified into 3 main categories: Interest expenses from borrowing money from financial institutions, Interest expenses from financial lease contracts and other financial costs.

The main financial cost of the company is interest expenses by borrowing from financial institutions, which during the year 2022-2024, the average proportion of interest expenses from borrowing from financial institutions is approximately 85.11% of the total financial cost.

In 2023, the Company's interest expenses from borrowing from financial institutions increased by 9.09 million baht, representing an increase of 58.49% because of the higher interest rates in 2023.

In 2024, the company had an increase in interest expenses from loans obtained from financial institutions by 24.73 million baht, or an increase of 85.45%, due to the higher interest rates in 2024 and the increase in long-term loans from financial institutions.

Interest expenses from financial lease contracts were proportional to the company's financial lease liabilities, which are mainly long-term leases of machinery and equipment used in the production of goods, long-term rental of trucks, pile drivers, cranes, and other vehicles, etc. In 2023, interest expenses from financial lease contracts decreased by 0.97 million baht or decreased by 40.25% compared to the previous year. In 2024, the company has interest expenses from financial lease contracts decreased by 0.57 million baht or equivalent to 39.58% compared to the previous year. The decrease each year was mainly due to the gradual repayment of debts under the Company's financial lease agreements.

#### Net profit

The company had a net profit during 2022-2024 of 100.78 million baht, 127.58 million baht and 117.31 million baht, or equivalent to a net profit margin of 4.74%, 6.37% and 5.60%, respectively.

In 2023, net profit of the company has increased by 26.80 million baht, or approximately 26.59%, from the same period of the previous year.

For 2024, the company had a net profit decrease of 10.26 million baht, or a decrease of 8.04% compared to the previous year.

#### Asset management capability

#### Total assets

As of December 31, 2024, the Company has total assets of 3,201.66 million baht, increase from the previous year of 2023 with total assets of 3,028.33 million baht or an increase of 5.72% which mainly increased from inventories, trade account receivable, cash and cash equivalents, work-in-process of the new factory of Siam Steel Wire Co., Ltd. and assets from investment in Wang Concrete Company Limited.

#### Total liabilities

## 5. General information and other material facts

#### 5.1 General information

#### General information

### Securities registrar

Name of securities registrar : Thailand Securities Depository Co., Ltd.

Address/location : 93 Ratchadaphisek Road

Subdistrict : Din Daeng
District : Din Daeng
Province : Bangkok
Postcode : 10400

Telephone : 02-009-9000
Facsimile number : 02-009-9991

#### Auditing firm

Name of auditing firm\* : DIA INTERNATIONAL AUDITING COMPANY LIMITED

Address/location : 316/32 SOI SUKHUMVIT 22

Subdistrict : KHLONG TOEI

District : KHLONG TOEI

Province : Bangkok

Postcode : 10110

Telephone : +66 2259 5300-2

Facsimile number : +66 2260 1553,+66 2259 8959

List of auditors : Miss SUPHAPHORN MANGJIT

License number : 8125

List of auditors : Mr APIPONG LEONGNARKTONGDEE

License number : 12199

List of auditors : Mr WIROTE SATJATHAMNUKUL

License number : 5128

## 5.2 Other material facts

## 5.2.1 Other information that may significantly influence investors' decision making

Other information that may influence investors' decision : No

## 5.2.2 Restrictions of foreign shareholders

Are there restrictions on foreign shareholders? : No

## 5.3 Legal disputes

Legal disputes

Is there any legal dispute? : No

Details of legal dispute

## 5.4 Secondary market

## Secondary market

Has the company's security been listed on a stock exchange in : No another country?

## 5.5 Financial institution with regular contact (in case of debt securities offeror)

## Financial institution with regular contact

Are there any debt securities offered? : No

Part 2 Corporate Governance

## 6. Corporate governance policy

## 6.1 Overview of the policy and guidelines

#### Overview of the policy and guidelines

Corporate governance policy and guidelines : Yes

The Company understands the value of good corporate governance and believes that it will benefit business operations. The Company has established a written corporate governance policy as a guideline for the performance of the employees by using the Good Corporate Governance Principles for Listed Companies Year 2017 or CG Code 2017 as a guideline in formulating the Company's corporate governance policy in order to foster confidence among shareholders, investors, and related parties and to create value for a sustainable business.

#### 6.1.1 Policy and guidelines related to the board of directors

directors

Guidelines related to the board of directors : Nomination of directors, Determination of director remuneration,

Independence of the board of directors from the management, Corporate governance of subsidiaries and associated companies

#### Nomination of directors

The Nomination and Remuneration Committee is responsible for nominating persons to be appointed as directors. The committee consists of 3 Company directors and the Chairman of the Nomination and Remuneration Committee is an independent director. The nominated persons shall be presented to the Board of Directors or the shareholders' meeting to for consideration and appointment, as the case may be. The Nomination and Remuneration Committee shall nominate directors by taking into consideration the structure of the Board, competence, work experience, and prescribed qualifications of the Public Limited Companies Act B.E. 2535 (and amended). In the case of independent directors, they shall have qualifications as specified in the notification of the Capital Market Supervisory Board or other relevant laws.

#### Determination of director remuneration

The Company has guidelines for determining the remuneration of directors. The Company has criteria for determining the remuneration of directors in an appropriate system, at the same level as the same industry and appropriate for the duties and responsibilities of each director. It has been considered by the Nomination and Remuneration Committee, which has considered the remuneration of directors and subcommittees by comparing it with the same industry and found that the remuneration of directors and subcommittees of the Company is appropriate.

#### Independence of the board of directors from the management

The Company has a practice to ensure that the Board of Directors is independent from the management. The Company has a Board of Directors of three persons, which is in accordance with the criteria stipulated by law. All three persons are independent, have no business relationship with the Company or have any other prohibited characteristics that would cause prohibited characteristics as specified in the announcement of the Capital Market Supervisory Board. The Company also requires the Chairman of the Board of Directors to be an independent director to ensure that the determination of the meeting agenda and the Board of Directors' meetings are independent from the management's influence.

#### Corporate governance of subsidiaries and associated companies

The Board of Directors Meeting has resolved to approve the policy of supervising subsidiaries and associated companies to be in accordance with the business code of conduct, rules, regulations, relevant laws, and to ensure that subsidiaries and associates operate in the same direction as the Company.

#### 6.1.2 Policy and guidelines related to shareholders and stakeholders

Are there policy and guidelines and measures related to : Yes

shareholders and stakeholders

Guidelines and measures related to shareholders and : Shareholders, Employee, Customer, Creditors, Government agencies,

stakeholders Community and society

#### **Shareholders**

The Company has measures related to shareholders by focusing on fair and transparent business operations, disclosing information sufficiently and timely as required by law. When there is a significant event as required by the relevant regulations, the Company will disclose information on such matter through the channels of the Stock Exchange of Thailand, including providing information on the Company's website to disclose information to shareholders. In addition, the Company has always focused on providing opportunities for minority shareholders to nominate persons to be elected as directors and to propose agendas for consideration at the general shareholders' meeting.

#### **Employee**

The Company treats its employees by focusing on meeting the employees' needs in terms of receiving fair compensation and benefits that are motivating and comparable to other businesses in the same industry. The Company regularly reviews the compensation structure and rates compared to other industries to ensure that the Company can still retain capable employees. In addition, the Company focuses on developing the potential of its employees by organizing training to develop the skills and abilities of its employees regularly in order to focus on employees continuously adding value to their work. The Company also focuses on creating a working society with a safe working environment by focusing on complying with safety regulations to reduce work accidents to zero for the well-being and safety of its employees.

#### Customer

The company has a customer-oriented approach where the company focuses on producing and delivering concrete products according to the contract in terms of both quantity and quality. The company has a machine maintenance plan and continuously implements the maintenance plan to ensure that the machines are always ready for use so that production and delivery of products to customers can be done according to the plan. The company also focuses on listening to customer feedback in order to use their perspectives and opinions to improve and develop the company's work. The company also has a professional team for producing, delivering, and installing concrete products to ensure that the company can solve problems for customers quickly, promptly, but accurately and precisely.

#### Creditors

The Company has a creditor practice whereby the Company focuses on strictly following the debt repayment plan with creditors and focuses on repaying debts on the payment date in order to assure creditors that they will definitely receive their debts on the due date, making creditors confident in trading with the Company. In order to maintain the Company's financial stability, the Company focuses on appropriate management of assets, costs, and liquidity of the business to ensure that the Company will have the ability to repay its debts to creditors.

#### Government agencies

The Company has a policy regarding government agencies or the public sector by focusing on conducting business in accordance with the relevant laws and regularly monitors changes in relevant laws and regulations to ensure that the Company can comply with the relevant laws and regulations correctly. In addition, the Company focuses on conducting business fairly and transparently. The Company has a policy to prevent corruption and emphasizes communication at all levels to ensure that such policy will be adhered to to ensure that the Company conducts business transparently and fairly.

#### Community and society

The Company has a community and social practice. The Company focuses on producing environmentally friendly concrete products that do not affect the community by using environmentally friendly raw materials and using clean solar energy in product production to be a part of environmental conservation and reduce impacts on both the environment and the community. The Company also has waste management measures from production to ensure that the Company does not release waste from production to create impacts on the community and the environment. The Company also has continuous activities with the community to ensure that the Company is a part of developing the community to grow sustainably along with the Company's business.

#### 6.2 Business code of conduct

#### Business code of conduct

Business code of conduct : Yes

In order to comply with the Company's good corporate governance policy, the Company has established a code of conduct for executives and employees to adhere to and comply with, along with the Company's rules and regulations, with the aim of ensuring that management and operations are transparent, clear, fair, and efficient, worthy of the trust and confidence of business partners, covering the following matters:

- 1. Business ethics

#### Audit Committee

Siam Technic Concrete Public Company Limited

No. 50 Soi Ngamwongwan, 47 Intersection 20, Ngamwongwan Road, Thung Song Hong Sub-district, Lak Si District, Bangkok 10210 The Company shall keep the information of such whistleblowing or complaints confidential.

In the year 2024, there is no case of whistleblowing regarding non-compliance with the Code of Conduct or illegal actions or behaviors that may imply corruption or misconduct by individuals in the Company including deficiencies of the internal control system from employees and any other stakeholders.

#### Preventing the misuse of inside information

The Board of Directors has approved the policy to supervise insider trading and the exploitation of internal information. The guidelines and methods for auditing directors and executives regarding the exploitation of undisclosed internal information for personal benefits have been determined as follows:

- (1) The directors and executives of the Company, including spouses and underaged children shall prepare and disclose securities holding reports and reports on changes in the Company's securities holdings to the Securities and Exchange Commission and in accordance with Section 59 and penalty provisions under Section 275 of the Securities and Exchange Act.
- (2) The Company has determined that directors, executives, managers or persons higher positions in accounting and finance, and related operatives aware of internal information that affects the price of securities to refrain from trading Company securities during the time period before the public disclosure of the Company's financial statement or financial positions. The Company shall provide a written notification to directors, executives, and division managers or persons of higher positions in accounting and finance to refrain from trading Company securities for at least 30 days prior to public disclosure and at least 24 hours following the public disclosure. Such internal information shall, in addition, not be disclosed to other persons. The Company imposes disciplinary penalties upon violation of using internal information for personal gain, starting from a written warning, wage cut, temporary suspension without pay or termination. Such punishment shall be determined based on the intention of the act and the seriousness of the offense.
- (3) Directors, executives, and employees of the Company are prohibited from exploiting the Company's undisclosed internal information gained through one's position or status, that affects or may affect the price of the Company's securities, to buy or sell securities, to offer to buy or to sell securities, or solicit other persons to buy or sell securities, or offer to buy or sell shares or other securities (if any) of the Company whether directly or indirectly in a way that is likely to cause losses to the Company, whether directly or indirectly and whether such action is for the benefit of oneself or of others; or such information has been disclosed for other persons to perform such actions so as to benefit oneself or not.
- (4) Directors, executives and employees of the Company or former directors, executives and employees who have resigned are prohibited from disclosing inside information or secrets as well as confidential information of the Company's partners that they have received from performing their duties to the third parties, even if such disclosure will not cause losses to the Company or trade partners.
- (5) Directors, executives, and employees of the Company or former directors, executives, and employees are obliged to maintain confidentiality of secrets and/or inside information of the Company and shall use such information for the benefit of the Company's business operations only. In this regard, directors, executives, and employees of the Company are prohibited from using the company's secret and/or inside information for the benefit of other companies in which they are shareholders, directors, executives, employees, or contractors.

#### Gift giving or receiving, entertainment, or business hospitality

The Company has a code of conduct that prohibits employees and executives from demanding, receiving, or agreeing to receive assets or other benefits from customers, traders, competitors, or any person doing business with the Company, or entertainment that is proven to be more than appropriate, except for traditional gifts or normal business entertainment or expenses for promoting the business that lead to trade reputation, in order to exchange according to custom. The Company has also announced a policy of not accepting gifts, "No Gift Policy", and has consistently communicated this policy to its business partners.

#### Compliance with laws, regulations, and rules

The Company focuses on compliance with laws, regulations, and rules set by various agencies related to the Company's business operations. The Company focuses on conducting business with honesty and integrity and conducting business with social responsibility, both in terms of law and ethics, and is committed to conducting business with responsibility towards the community, society, and the environment.

#### Information and assets usage and protection

The Company has a code of conduct that requires executives and employees at all levels to help each other be careful and protect the Company's assets from loss or damage, and must not use the Company's assets and information for personal gain or for the benefit of others that is not related to the Company's business operations.

The Company has a requirement to maintain the confidentiality of the Company's customers, and disclosure of such information must be done in accordance with proper and appropriate guidelines as permitted.

#### Anti-unfair competitiveness

The Company has a business ethics in combating unfair competition. The Company aims to treat customers fairly in terms of products and services without discrimination. The Company has a procurement process and fair contract or agreement terms and conditions, focuses on doing business openly and transparently, and does not create unfair competitive advantages.

### Selection of independent directors

### Criteria for selecting independent directors

The Nomination and Remuneration Committee is responsible for nominating persons to be appointed as directors. The committee consists of 3 Company directors and the Chairman of the Nomination and Remuneration Committee is an independent director. The nominated persons shall be presented to the Board of Directors or the shareholders' meeting to for consideration and appointment, as the case may be. The Nomination and Remuneration Committee shall nominate directors by taking into consideration the structure of the Board, competence, work experience, and prescribed qualifications of the Public Limited Companies Act B.E. 2535 (and amended). In the case of independent directors, they shall have qualifications as specified in the notification of the Capital Market Supervisory Board or other relevant laws.

#### Business or professional relationships of independent directors over the past year

Business or professional relationships of independent : No directors over the past year

### Selection of directors and the highest-ranking executive

#### Method for selecting directors and the highest-ranking executive

#### 1. The nomination of directors

the Nomination and Remuneration Committee shall nominate persons to be appointed as the Company's directors. Such persons shall be knowledgeable in the Company's business and be able to dedicate sufficient time for their duties. They shall also be capable of utilizing their knowledge and skills to perform duties for the benefit of the Company. Such persons shall, in addition, be honest and ethical in business operations. The nomination process for directors is as follows:

- The Nomination and Remuneration Committee nominates qualified persons for the position of director to replace the vacant director positions.
- In the event that a minor shareholder nominates a person to be appointed as the Company's director in advance, the Nomination and Remuneration Committee shall consider the person nominated by minority shareholders as well.
- Create a list of names, educational background, work history, and photograph of qualified persons along with reasons for nomination to be presented to the Board of Directors and/or shareholders of the Company for appointment consideration.

At every annual general meeting of shareholders, one-third of the total number of directors shall resign. If the number of directors is not exactly divisible into three, the number closest to one-third shall be retired. Retired directors may be re-appointed. The shareholders' meeting shall appoint directors in accordance to the following criteria and processes as set by the Company.

- 1) Each shareholder has one vote per share.
- 2) Each shareholder may use all their votes to nominate one person or more persons as director. In the event of appointing more than one directors, votes may not be divided among the candidates.
- 3) Persons receiving the highest number of votes in descending order shall be appointed as directors equal to the designated number of directors or the required or the number of directors to be appointed at that time. In the case of equal number of votes between two persons which exceeds the designated number of directors to be elected, the chairman of the meeting shall have the casting vote.

#### 2. The recruitment of top executives

In the event that the position of the top management of the Company, i.e. Chief Executive Officer is vacant, the Nomination and Remuneration Committee shall select persons with knowledge, capability, and experience advantageous to management. Such persons shall also have a good understanding of the Company's business, vision, leadership, and be able to dedicate time to the Company. The names of suitable persons shall be proposed to the Board of Directors for further consideration and appointment

Method for selecting persons to be appointed as : Ye

directors through the nomination committee

Method for selecting persons to be appointed as the : Ye

highest-ranking executive through the nomination

committee

#### Rights of minority shareholders on director appointment

The Company recognizes the importance of encouraging shareholders to participate in the appointment of directors in order to comply with the principles of good corporate governance regarding the care of shareholders' rights. The Company has therefore provided shareholders with an opportunity to nominate persons with suitable qualifications to be considered for election as directors of the Company in advance. The Company has provided shareholders with an opportunity to nominate persons to be elected as directors of the Company from October 15, 2024 to December 31, 2024. However, it appears that after the said deadline, no shareholders have proposed any persons to be elected as directors of the Company.

Method of director appointment : Method whereby each director requires approval votes more than half of

the votes of attending shareholders and casting votes

## Information on the evaluation of duty performance of directors

### Criteria for evaluating the duty performance of the board of directors

The Company evaluates the performance of the Board of Directors in the form of a group evaluation. The evaluation is made to determine whether the Board of Directors has performed their duties in various matters completely as specified in the Board of Directors' Charter and other relevant laws. The Board of Directors has a structure and qualifications that are appropriate and

sufficient to perform their duties. The Board of Directors has devoted time or given importance to considering matters that are the responsibilities of the Board of Directors as specified.

### Evaluation of the duty performance of the board of directors over the past year

The Board of Directors has evaluated the performance of the Board of Directors and is of the opinion that the Board of Directors has performed its duties completely as specified in the Board of Directors Charter and other laws, announcements and regulations related to such matters. The Board of Directors has given importance and spent time considering and reviewing the Company's direction, strategies and business plans, the Company's corporate governance, the Company's business ethics, overseeing conflicts of interest, overseeing related party transactions, internal control, risk management, financial statement preparation, selection and consideration of director remuneration, and other matters specified in the Board of Directors Charter.

### Prevention of the use of inside information to seek benefits

### Operations for prevention of the use of inside information to seek benefits over the past year

Has the company operated in preventing the use of : Yes inside information to seek benefits over the past year

The Board of Directors has approved the policy to supervise insider trading and the exploitation of internal information. The guidelines and methods for auditing directors and executives regarding the exploitation of undisclosed internal information for

personal benefits have been determined as follows:

- (1) The directors and executives of the Company, including spouses and underaged children shall prepare and disclose securities holding reports and reports on changes in the Company's securities holdings to the Securities and Exchange Commission and in accordance with Section 59 and penalty provisions under Section 275 of the Securities and Exchange Act.
- (2) The Company has determined that directors, executives, managers or persons higher positions in accounting and finance, and related operatives aware of internal information that affects the price of securities to refrain from trading Company securities during the time period before the public disclosure of the Company's financial statement or financial positions. The Company shall provide a written notification to directors, executives, and division managers or persons of higher positions in accounting and finance to refrain from trading Company securities for at least 30 days prior to public disclosure and at least 24 hours following the public disclosure. Such internal information shall, in addition, not be disclosed to other persons. The Company imposes disciplinary penalties upon violation of using internal information for personal gain, starting from a written warning, wage cut, temporary suspension without pay or termination. Such punishment shall be determined based on the intention of the act and the seriousness of the offense.
- (3) Directors, executives, and employees of the Company are prohibited from exploiting the Company's undisclosed internal information gained through one's position or status, that affects or may affect the price of the Company's securities, to buy or sell securities, to offer to buy or to sell securities, or solicit other persons to buy or sell securities, or offer to buy or sell shares or other securities (if any) of the Company whether directly or indirectly in a way that is likely to cause losses to the Company, whether directly or indirectly and whether such action is for the benefit of oneself or of others; or such information has been disclosed for other persons to perform such actions so as to benefit oneself or not.
- (4) Directors, executives and employees of the Company or former directors, executives and employees who have resigned are prohibited from disclosing inside information or secrets as well as confidential information of the Company's partners that they have received from performing their duties to the third parties, even if such disclosure will not cause losses to the Company or trade partners.
- (5) Directors, executives, and employees of the Company or former directors, executives, and employees are obliged to maintain confidentiality of secrets and/or inside information of the Company and shall use such information for the benefit of the Company's business operations only. In this regard, directors, executives, and employees of the Company are prohibited from using the company's secret and/or inside information for the benefit of other companies in which they are shareholders, directors, executives, employees, or contractors.

### Anti-corruption action

#### Operations in anti-corruption in the past year

Has the company operated in anti-corruption over the : Yes

past year

Form of operations in anti-corruption :

Review of appropriateness in anti-corruption, Communication and training for employees on anti-corruption policy and guidelines, Review of the completeness and adequacy of the process by the Audit Committee or

auditor

The Company is committed to conducting business with honesty, integrity, transparency and in accordance with the principles of good corporate governance. An anti-corruption policy has therefore been established for the Company's personnel to adhere to as a guideline for work. The main principle within is "The Company does not accept any form of corruption, both directly and indirectly". The details of the policy are as follows.

1. Company personnel must not engage in any form of corruption, whether directly and indirectly.

- 2. Company personnel must be cautious in matters related to receiving and giving gifts, properties, or any other benefits. The act of giving or accepting gifts and entertainment shall be for business purposes alone, where the value shall be within reasonable thresholds and not significantly affect decision making.
- 3. Establish an efficient and appropriate internal control and risk assessment system on a regular basis to prevent corruption. Review and assess the risks from operations that may lead to corruption at least once a year.
- 4. Establish a transparent and accurate financial reporting system within internationally accepted accounting standards.
- 5. Establish a human resources management process reflecting the commitment to anti-corruption measures.
- 6. Provide communication channels for personnel whistleblowing as well as providing suggestions and complaints about corruption with measures to protect whistleblowers.
- 7. Operate in accordance with anti-corruption laws.
- 8. Any action that violates or does not comply with this policy, whether directly or indirectly shall be met with disciplinary measures as per imposed by the Company or punished by law.

### 9. Internal control and related party transactions

### 9.1 Internal control

# Summary of the opinion of the board of directors regarding the internal control of the company

In this regard, at the Board of Directors' Meeting No. 1/2568 held on 26 February 2025, all members of the Board of Directors attended the meeting, comprising of (1) 3 Independent Directors who are the Audit Committee of the Company, and (2) 5 Company Directors attended the meeting. The Board of Directors asked for information from the management regarding the adequacy of the Company's internal control system in all 5 components, consisting of:

- 1) Control Environment
- 2) Risk Assessment
- 3) Control Activities
- 4) Information & Communication
- 5) Monitoring Activities.

The Board of Directors believes that the Company's internal control system is sufficient and appropriate according to the internal control system adequacy assessment form of the Securities and Exchange Commission. The Company has provided sufficient personnel to operate the system effectively, including having an internal control system for monitoring and supervising the Company's operations to be able to protect the Company's assets from damage from wrongful or unauthorized use of directors or executives, including transactions with persons who may have conflicts of interest or connected persons. For other matters of internal control, the Board of Directors deems that the Company has sufficient internal control as well

#### 9.1.1 Adequacy and appropriateness of the company's internal control system

Company's internal control system : COSO - Enterprise Risk Management Framework (ERM)

#### COSO - Enterprise Risk Management Framework (ERM)

#### Overview of internal corporate controls

The Company places importance on the internal control system, recognizing that an adequate and appropriate internal control system will enable the Company's business to operate stably and sustainably. Therefore, the principles and concepts of internal control in accordance with the COSO guidelines are applied by following the following 5 components

- 1. Control Environment
- 2. Risk Assessment
- 3. Control Activities
- 4. Information and Communication in the Organization
- 5. Monitoring and evaluation

### COSO guidelines, the company has implemented various actions. As follows

#### 1. Control Environment

The Company support everyone in the organization to be aware of the importance and necessity of the internal control system and support everyone in the organization to know their roles and perform their duties with honesty and ethics.

In terms of honesty and ethics and the duties of executives and personnel The Company has established a Code of Conduct, a charter, and established various important policies. In order to have operational standards, the Company has prepared a manual of practices covering the Company's important business activities.

The Company has established an organizational structure and clearly defined authority and responsibilities, which results in the operations of each department being supervised to be consistent with the Company's guidelines.

The Company has an internal audit department under the supervision of the Audit Committee to be the unit that inspects, evaluates the efficiency and adequacy of internal control. The internal audit department is independent in reporting the audit results directly to the Audit Committee.

The Company appoints external auditors who are independent in performing auditing and reporting in accordance with auditing standards and other relevant standards.

#### 2. Risk Assessment

The Company has reviewed internal controls by assessing the adequacy of the control system. Internally for the company's important business processes (Business Cycles) by identifying risks, prioritizing risks to know what risks are present in each of the company's work processes, and setting policies and guidelines to control those risks.

The Company has established a Risk Management Committee with the objective of setting risk management policies covering the entire organization, including overseeing the establishment of a risk management system or process to appropriately reduce the impact on the Company's business.

#### Control Activities

In the work process, operators will have guidelines for their operations from policies and operating manuals, approval authority table, operating authority table, which determines that operations are considered according to the work line and there is a review between the work lines to prevent/reduce the occurrence of risks (preventive control)

The company has set key performance indicators in important transactions and has summarized and reported the results, and regularly evaluated the performance to know whether the company's operations are in line with the schedule or targets. If there is any part that does not meet the set targets, the cause will be analyzed and solutions/improvements will be found (discovery control, corrective control, promotion control).

#### 4. Information and Communication in the Organization

Information and communication within the organization The company has many channels for communicating information both inside and outside the organization, including websites, Intranet (internal email), Share drive, etc.

#### 5. Monitoring and Evaluation

In the Company's important transactions, goals and plans are set and results are summarized and reported to the Executive Committee every month.

The Company has an Internal Audit Department which is the unit responsible for reviewing the performance results to see if they are in accordance with the specified processes/policies and whether the effectiveness is in line with the specified goals. The Internal Audit Department can provide recommendations and reports independently and is directly under the Audit Committee.

#### 9.1.2 Deficiencies related to the internal control system

|   | 2022 | 2023 | 2024 |
|---|------|------|------|
| Total number of deficiencies related to the internal control system (cases) | 0    | 0    | 0    |

# 9.2.3 Policy and future trends of related party transactions and the compliance

## with the obligations specified in the prospectus of the company

# Measures and procedures for approving related party transactions or connected transactions

The Company expects that related party transactions arising from the Company's normal business operations will continue in the future as necessary and appropriate, such as sales of goods and services and purchases of raw materials, etc. Such related party transactions will be in accordance with the nature of trade with conditions as specified in the Board of Directors' Meeting No. 3/2019 on May 30, 2019, which resolved to determine the policy and procedures for approving related party transactions between the Company and persons who may have conflicts of interest, have interests, or may have conflicts of interest in the future, such as major shareholders, directors, executives, persons with controlling power, related persons, or related persons, etc. The Company will comply with the Securities and Exchange Act, regulations, announcements, orders, or requirements of the Securities and Exchange Commission, the Capital Market Supervisory Board, and the Stock Exchange of Thailand in relation to such matters, including compliance with the requirements regarding disclosure of information on related party transactions of the Company in accordance with the accounting standards set by the Accounting Professions Council under Royal Patronage. Persons who may have conflicts of interest or interests in the transactions will not be able to participate or have no right to vote in approving such transactions.

In the event that the law requires approval of the related party transaction from the Company's board of directors or shareholders' meeting, the Company will arrange for the Audit Committee to attend the meeting to consider and provide opinions on the necessity of the transaction and the reasonableness of such transaction.

In this regard, the transactions between each other that are commercial transactions with general commercial terms and conditions, and the transactions that are not commercial terms or other transactions shall have the following principles:

#### Transactions with general trading conditions

Transactions that are transactions with general trading conditions, the Company will have transactions between each other, such as selling or purchasing products, which the Company has set the framework for such transactions, which has been considered and approved by the Audit Committee and approved in principle by the Board of Directors. When such transactions are made, the management can approve such transactions if those transactions have trade agreements with general trading conditions that a reasonable person would do with a counterparty in the same situation, with bargaining power without influence from the status of a director, executive or related person. The Company will prepare a summary report of transactions between each other with directors, executives or related persons to report to the Audit Committee meeting and the Board of Directors for acknowledgement of the transactions every quarter.

#### Transactions that are not subject to general trading conditions or other transactions

Transactions that are not subject to general trading conditions or other transactions that occur between the Company and persons who may have conflicts of interest, have interests or may have conflicts of interest in the future, the Company must submit to the Audit Committee for consideration and opinion on the necessity and appropriateness of the transaction, as well as the appropriateness of the price and conditions of such transaction, and compare it with the price made with external persons or the market price before presenting it to the Board of Directors and/or the shareholders' meeting, as the case may be, for further consideration and approval. In the event that the Audit Committee does not have expertise in considering the possible related party transactions, the Company will have an independent expert or the Company's auditor provide an opinion on such related party transactions to be used in the decision-making of the Audit Committee, the Board of Directors and/or the shareholders' meeting, as the case may be, in which persons who may have conflicts of interest or interests in the transaction will not be able to participate or have no right to vote in approving such related party transactions.

# Future trends in related party transactions

The Company expects that related party transactions arising from the Company's normal business operations will continue in the future as necessary and appropriate, such as sales of goods and services and purchases of raw materials, etc. Such related party transactions will be in accordance with the nature of trade with general trading conditions, which clearly stipulate guidelines for proving the fairness of related party transactions that are normal business transactions. The prices and conditions must be fair and reasonable, taking into account the Company's benefits and not cause any transfer of benefits, including taking into account the Company's benefits as the main consideration. The Company's Audit Committee will review and provide opinions on related party transactions that are normal business transactions or support normal business transactions on a quarterly basis. However, the guarantee of the loan from the financial institution to the related business has been released from the financial institution on January 15, 2020.

For related party transactions with persons who may have conflicts of interest, which are in the nature other than the first paragraph, namely, normal business transactions and transactions supporting normal business, which do not have general trading conditions, and other related party transactions, the Company has established a policy to proceed in accordance with the measures and procedures for approving related party transactions and disclosing information on the transactions as specified above.

# 9.2.4 Information on appraised assets and appraisal price in conjunction with the execution of related party transactions

Can be referred in attachment 4: assets for business undertaking and details of asset appraisal

Part 3 Financial Statement

Auditor's Report

# SIAM TECHNIC CONCRETE PUBLIC COMPANY LIMITED

# AND ITS SUBSIDIARIES

# AUDITOR'S REPORT AND FINANCIAL STATEMENTS

FOR THE YEAR ENDED DECEMBER 31, 2024

# INDEPENDENT AUDITOR'S REPORT

#### To the Shareholders of Siam Technic Concrete Public Company Limited

## **Opinion**

I have audited the accompanying consolidated and separate financial statements of Siam Technic Concrete Public Company Limited and ITS Subsidiaries (the Group) and of Siam Technic Concrete Public Company Limited (Company) which comprise the consolidated and separate statements of financial position as at December 31, 2024, and the consolidated and separate statements of comprehensive income, consolidated and separate statements of changes in shareholders' equity and consolidated and separate statements of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In my opinion, the accompanying consolidated and separate financial statements present fairly, in all material respects, the financial position of Siam Technic Concrete Public Company Limited and ITS Subsidiaries and of Siam Technic Concrete Public Company Limited as at December 31, 2024, and their financial performance and cash flows for the year then ended in accordance with Thai Financial Reporting Standards.

# **Basis for Opinion**

I conducted my audit in accordance with Thai Standards on Auditing. My responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of my report. I am independent of the Company in accordance with the Code of Ethics for Professional Accountants including Independence Standards issued by the Federation of Accounting Professions (Code of Ethics for Professional Accounts) that are relevant to my audit of the financial statements, and I have fulfilled my other ethical responsibilities in accordance with Code of Ethics for Professional Accountants. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

## **Key Audit Matters**

Key audit matters are those matters that, in my professional judgment, were of most significance in my audit of the consolidated and separate financial statements of the current period. These matters were addressed in the context of my audit of the consolidated and separate financial statements as a whole, and in forming my opinion thereon, and I do not provide a separate opinion on these matters.

# Recognition of revenue from the sale of goods and services

As mentioned in note3(r) and 24 to financial statement regarding the recognition of revenue from the sale of goods and services presented in the consolidated financial statements and separate financial statements of Baht 1,792 million and 1,845 million respectively. The Group's revenues is recognized when the Customer has control over goods or services, by recognizing in the amount having certain probability at a high level that there will be no significant reversal of revenue. There is a risk that the Group will inappropriately recognize revenue from sale of goods and services. Therefore, I have considered it as key audit matter.

I have obtained an assurance regarding recognition of revenue from sales and services of the Group by

- Obtain an understanding recognition process of revenue from sales with services and identify performance obligation in the contract control power of goods and services and related internal control systems.
- Review the design and test key control systems regarding revenue recognition
- Perform analytical review revenue from sales and services the comparison of the list of products and services that occur
- Review by random the supporting document of revenue from sales of goods and services occurred during
  the year and before the end of reporting period, including credit notes issued after the reporting period, and
- Review journal voucher to audit irregular transaction possibly incurred of revenue from sales and services

### Other Information

Management is responsible for the other information. The other information comprises information in the annual report of the Group but does not include the consolidated and separate financial statements and my auditor's report thereon. The annual report of the Group is expected to be made available to me after the date of this auditor's report.

My opinion on the consolidated and separate financial statements does not cover the other information and I do not and will not express any form of assurance conclusion thereon.

In connection with my audit of the consolidated and separate financial statements, my responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or my knowledge obtained in the audit, or otherwise appears to be materially misstated.

When I read the annual report of the Group, if I conclude that there is a material misstatement therein, I am required to communicate the matter to those charged with governance for correction of the misstatement.

# Responsibilities of Management and Those Charged with Governance for the Consolidated and Separate Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with Thai Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, management is responsible for assessing the Group's and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to Going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

# Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements

My objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Thai Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with Thai Standards on Auditing, I exercise professional judgment and maintain professional skepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures
  that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
  effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure, and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements.
   I am responsible for the direction, supervision, and performance of the group audit. I remain solely responsible for my audit opinion.

- 5 -

I communicate with those charged with governance regarding, among other matters, the planned scope and timing

of the audit and significant audit findings, including any significant deficiencies in internal control that I identify

during my audit.

I also provide those charged with governance with a statement that I have complied with the Code of Ethics for

Professional Accountants regarding independence, and to communicate with them all relationships and other

matters that may reasonably be thought to bear on my independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, I determine those matters that were of most

significance in the audit of the consolidated and separate financial statements of the current period and are

therefore the key audit matters. I describe these matters in my auditor's report unless law or regulation precludes

public disclosure about the matter or when, in extremely rare circumstances, I determine that a matter should not

be communicated in my report because the adverse consequences of doing so would reasonably be expected to

outweigh the public interest benefits of such communication.

# 2.5 Dissolution of a subsidiary \*\*

On November 21 and 27, 2024 The Company already registered to liquidate at Department of Business Development ,Ministry of Commerce. The financial statement of such companies were not included in the consolidated statement of financial position. The consolidated statement of comprehensive income for the year ended December 31, 2024 have been included profit and loss for the eleven-month period ended November 21 and 27, 2024 which were liquidation date of subsidiaries

#### Notes to financial statements

### For the year ended 31 December 2024

# 3 Significant accounting policies

The accounting policies set out below have been consistently applied to all periods presented in these financial statements.

#### (a) Foreign currencies

Transactions in foreign currencies

Transactions in foreign currencies are translated to the respective functional currencies of the Company entities at exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the functional currency at the foreign exchange rates ruling at that date.

Non-monetary assets and liabilities measured at cost in foreign currencies are translated to the functional currency using the foreign exchange rates ruling at the dates of the transactions.

Foreign exchange differences arising on translation are recognised in profit or loss.

### (b) Cash and cash equivalents

Cash and cash equivalents in the statement of cash flows comprise cash on hand, saving deposits, current deposits and highly liquid short-term investments. Bank overdrafts that are repayable on demand are part of cash and cash equivalents in the statement of cash flows.

In addition, bank overdrafts that are repayable on demand are a component of financing activities for the purpose of the statement of cash flows.

#### (c) Inventories

Inventories are measured at the lower of cost and net realizable value.

The cost of inventories is measured by using the first-in, first-out method.

Cost comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. In the case of manufactured inventories and goods in process, cost includes an appropriate share of overheads based on normal production capacity.

#### Notes to financial statements

#### For the year ended 31 December 2024

Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs to complete and to make the sale.

Provision is provided, where necessary, for obsolete, slow-moving and defective inventories.

#### (d) Construction contracts in progress

Construction contracts in progress represents unbilled work which is expected to receive from customers under current construction contracts. Cost of construction in progress is carried at cost of construction plus earned income less amount billed from customers and recognised loss. Cost of constructions includes expenditure that is directly attribute to all construction contract and fixed/variable cost allocation which resulted following the company's construction contract and is based on the ability to operate as normal.

Amount of construction contracts in progress is shown as separate item under current assets in statement of financial position. Difference between higher of amount billed from customers and recognised revenues from construction is shown as advance received from customers under current liabilities in statement of financial position.

#### (e) Investments

Investments in subsidiaries

Investments in subsidiaries is accounted for in the separate financial statements using the cost method.

#### (f) Investment properties

Investment properties are property which are held to earn rental income, for capital appreciation or for both, but not for sale in the ordinary course of business, use in the production or supply of goods or services or for administrative purposes.

Investment properties are measured stated at cost less accumulated depreciation and impairment losses.

Cost includes expenditure that is directly attributable to the acquisition of the investment property. The cost of self-constructed investment property includes the cost of materials and direct labour, and other costs directly attributable to bringing the investment property to a working condition for its intended use.

Depreciation is charged to profit or loss on a straight-line basis over the estimated useful lives of each property.

No depreciation is provided on freehold land.

Notes to financial statements

For the year ended 31 December 2024

(g) Property, Plant and Equipment

Recognition and measurement

Proprietary assets of the business

Property, plant and equipment are stated at cost less accumulated depreciation and provision for impairment (if any).

Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the assets to a working condition for their intended use, the costs of dismantling and removing the items and restoring the site on which they are located, and capitalised borrowing costs. Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Any gains or losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and are recognised in profit or loss.

Subsequent expenditures

Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost of the item can be measured reliably. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised. All other regular repairs and maintenance costs are expensed as incurred.

Depreciation

Depreciation is calculated based on the depreciable amount, which is the cost of an asset, or other amount substituted for cost, less its residual value.

Depreciation is charged to profit or loss on a straight-line basis over the estimated useful lives of each component of an item of property, plant and equipment. The estimated useful lives are as follows:

24

#### Notes to financial statements

### For the year ended 31 December 2024

Land improvements 5 years

Building and factory 5 - 30 years

Machine and equipment 2 - 15 years

Office furniture, fixtures and equipment 3 - 10 years

Vehicle 5 - 15 years

No depreciation is provided on freehold land and assets under construction.

Depreciation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

#### (h)Leases

At inception of contact, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

#### a) Right-of-use assets

Right-of-use assets at the commencement date of the lease. Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised through initial measurement, initial direct costs incurred, and lease payments made at or before the commencement date, less any lease incentives received.

The cost of right-of-use assets also includes an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease.

Depreciation of right-of-use assets are calculated by reference to their costs on a straight-line basis over the shorter of their estimated useful lives and the lease term, as follows:

Machine and equipment 5 - 15 years
Vehicles 5 - 15 years

#### b) Lease liabilities

Lease liabilities are measured at the present value of the lease payments to be made over the lease term. The lease payments include fixed payments less any lease incentives receivable, and amounts

#### Notes to financial statements

#### For the year ended 31 December 2024

expected to be payable under residual value guarantees. Moreover, the lease payments include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating the lease, if the lease term reflects the Company exercising an option to terminate. Variable lease payments that do not depend on an index or a rate are recognised as expenses in the period in which the event or condition that triggers the payment occurs. In calculating the present value of lease payments, the Company uses its incremental borrowing rate, which is determined by referring to the government bond yield adjusted with risk premium depending on the lease term, at the lease commencement date if the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a change in the lease term, a change in the lease payments or a change in the assessment of an option to purchase the underlying asset.

#### c) Short-term leases and leases of low-value assets

A lease that has a lease term less than or equal to 12 months from commencement date or a lease of low-value assets is recognised as expenses on a straight-line basis over the lease term.

#### (h) Goodwill

The Group initially recorded goodwill at cost, which equals to the excess of cost of business over the fair value of the net assets acquired. If the fair value of the net assets acquired exceeds the cost of business combination the excess is immediately recognized as gain in profit or loss.

The Group carried goodwill at cost less any accumulated impairment losses and tested for impairment annually and when circumstances indicate that the carrying value may be impaired.

#### Notes to financial statements

#### For the year ended 31 December 2024

### (i) Intangible assets

Intangible assets

Other intangible assets that are acquired by the Company and have finite useful lives are measured at cost less accumulated amortisation and provicion for impairmet (if any).

### Subsequent expenditure

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, is recognised in profit or loss as incurred.

Amortisation

Amortisation is based on the cost of the asset, or other amount substituted for cost, less its residual value.

Amortisation is recognised in statement of income on a straight-line basis over the estimated useful lives of intangible assets, other than goodwill, from the date that they are available for use. The estimated useful lives for the current and comparative periods are as follows:

Software licences 3 - 5 years

Amortisation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

### (j) Impairment of non-financial assets

The carrying amounts of the Company's assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, the assets' recoverable amounts are estimated. For goodwill and intangible assets that have indefinite useful lives or are not yet available for use, the recoverable amount is estimated each year at the same time.

An impairment loss is recognised if the carrying amount of an asset exceeds its recoverable amount. The impairment loss is recognised in profit or loss unless it reverses a previous revaluation credited to equity, in which case it is charged to equity

When a decline in the fair value of an available-for-sale financial asset has been recognised directly in equity and there is objective evidence that the value of the asset is impaired, the cumulative loss that had been recognised

#### Notes to financial statements

#### For the year ended 31 December 2024

directly in equity is recognised in the profit or loss even though the financial asset has not been derecognised. The amount of the cumulative loss that is recognised in the statement of income is the difference between the acquisition cost and current fair value, less any impairment loss on that financial asset previously recognised in profit or loss.

#### Calculation of recoverable amount

The recoverable amount of the Company's investments in held-to-maturity securities at amortised cost is calculated as the present value of estimated future cash flows, discounted at the original effective interest rate.

The recoverable amount of available-for-sale investments is calculated by reference to the fair value. The recoverable amount of a non-financial asset is the greater of the asset's value in use and fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For non-cash generated assets independant upon, the recoverable value will be considered with related cash generated assets.

### Reversals of impairment

An impairment loss in respect of a financial asset is reversed if the subsequent increase in recoverable amount can be related objectively to an event occurring after the impairment loss was recognised in profit or loss. For financial assets carried at amortised cost and available-for-sale financial assets that are debt securities, the reversal is recognised in profit or loss. For available-for-sale financial assets that are equity securities, the reversal is recognised in other comprehensive income.

Impairment losses recognised in prior periods in respect of other non-financial assets are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognized except for impairment loss recognized for goodwill is not reversed in a subsequent period.

#### Notes to financial statements

#### For the year ended 31 December 2024

### (k) Interest-bearing liabilities

Interest-bearing liabilities are recognised initially at cost less attributable transaction charges. Subsequent to initial recognition, interest-bearing liabilities are stated at amortised cost with any difference between cost and redemption value being recognised in the profit or loss over the period of the borrowings on an effective interest basis.

(l) Trade accounts payable and other payables

Trade accounts payable and other payables are stated at cost.

(m) Employee benefit

Defined contribution plans

Obligations for contributions to defined contribution plans are expensed as the related service is provided.

Defined benefit plans

The Company's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount.

The calculation of defined benefit obligations is performed annually by a qualified actuary using the projected unit credit method. When the calculation results in a potential asset for the Company, the recognised asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. To calculate the present value of economic benefits, consideration is given to any application minimum funding requirements of the Company.

Remeasurements of the net defined benefit liability, actuarial gain or loss are recognised in other comprehensive income. The Company determines the interest expense on the net defined benefit liability for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period, taking into account any changes in the net defined benefit liability during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in profit or loss.

#### Notes to financial statements

#### For the year ended 31 December 2024

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognised immediately in profit or loss. The Company recognises gains and losses on the settlement of a defined benefit plan when the settlement occurs.

#### Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

### (n) Share-based payments

The grant-date fair value of equity-settled share-based payment awards granted to employees is generally recognised as an expense, with a corresponding increase in equity, over the vesting period of the awards. The amount recognised as an expense is adjusted to reflect the number of awards for which the related service and non-market performance conditions are expected to be met, such that the amount ultimately recognised is based on the number of awards that meet the related service and non-market performance conditions at the vesting date. For share-based payment awards with non-vesting conditions, the grant-date fair value of the share-based payment is measured to reflect such conditions and there is no true-up for differences between expected and actual outcomes.

The fair value of the amount payable to employees in respect of share appreciation rights, which are settled in cash, is recognised as an expense with a corresponding increase in liabilities, over the period that the employees become unconditionally entitled to payment. The liability is remeasured at each reporting date and at settlement date. Any changes in the fair value of the liability are recognised as personnel expense in profit or loss.

### (o) Provisions

A provision is recognised if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation.

#### Warranties

A provision for warranties is recognised when the underlying products or services are sold. The provision is based on historical warranty data and a weighting of all possible outcomes against their associated probabilities.

Notes to financial statements

For the year ended 31 December 2024

Provision from onerous executory contracts

Provision from onerous executory contracts is recognised when future benefits that the Company received is less

than the necessary costs needed to fulfil contractual obligations. Provisions is recognised based on the lower of

the present value of expected cost incurred at the end of the contract or net cost that is expected to incur when

continuing the contract. The Company recognised impairment loss resulted from assets as stated in the contract

before recognition and measurement of liabilities.

(p) Financial instruments

The Company initially measures financial assets at its fair value plus, in the case of financial assets that are not

measured at fair value through profit or loss, transaction costs. However, trade receivables, that do not contain a

significant financing component are measured at the transaction price as disclosed in the accounting policy

relating to revenue recognition.

Classification and measurement of financial assets

Financial assets are classified, at initial recognition, as to be subsequently measured at amortised cost, fair value

through other comprehensive income ("FVOCI"), or fair value through profit or loss ("FVTPL"). The

classification of financial assets at initial recognition is driven by the Company's business model for managing

the financial assets and the contractual cash flows characteristics of the financial assets.

Financial assets at amortised cost

The Group measures financial assets at amortised cost if the financial asset is held in order to collect contractual

cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely

payments of principal and interest on the principal amount outstanding.

Financial assets at amortised cost are subsequently measured using the effective interest rate ("EIR") method and

are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised,

modified or impaired.

Financial assets at FVTPL

Financial assets measured at FVTPL are carried in the statement of financial position at fair value with net

changes in fair value recognised in profit or loss.

These financial assets include derivatives, security investments held for trading

Financial assets at FVOCI

31

#### Notes to financial statements

#### For the year ended 31 December 2024

Financial assets include investment in equity securities that not held for trading but held for strategic purposes or for securities with potential for high market volatility measured at fair value through other comprehensive income, where an irrevocable election has been made by the management. Such classification is determined on an instrument-by-instrument basis. Gains and losses arising from changes in fair value is recognised in other comprehensive income and not subsequently transferred to profit or loss when disposal, instead, it is transferred to retained earnings.

Dividends on listed equity investments are recognised as other income in profit or loss.

#### Classification and measurement of financial liabilities

Except for derivative liabilities, at initial recognition the Group's financial liabilities are recognised at fair value net of transaction costs and classified as liabilities to be subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process. In determining amortised cost, the Company takes into account any fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance costs in profit or loss.

The Group may elect to measure financial liabilities at FVTPL if doing so eliminates, or significantly reduces a recognition inconsistency (sometimes referred to as an accounting mismatch).

### Derecognition of financial instruments

A financial asset is primarily derecognised when the rights to receive cash flows from the asset have expired or have been transferred and either the Company has transferred substantially all the risks and rewards of the asset, or the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

#### Notes to financial statements

#### For the year ended 31 December 2024

### Impairment of financial assets

For trade receivables and contract assets, The Group applies a simplified approach in calculating ECLs. Therefore, the Company does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date.

It is based on its historical credit loss experience and adjusted for forward-looking factors specific to the debtors and the economic environment.

A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

#### (q) Share capital

Ordinary shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

#### (r) Revenue

Revenue is recognized when a customer obtains control of the goods or services in an amount that reflects the consideration to which the Company expects to be entitled, excluding those amounts collected on behalf of third parties, value added tax or other sales taxes and is after deduction of any trade discounts and volume rebates.

Sale of goods and rendering of services

Revenue from sales of goods is recognized when a customer obtains control of the goods, generally on delivery of the goods to the customers. For contracts that permit the customers to return the goods, revenue is recognized to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognized will not occur. Therefore, the amount of revenue recognized is adjusted for estimated returns, which are estimated based on the historical data.

Revenue for rendering of services is recognized as services are provided on the basis of stage of completion of the transaction.

For bundled packages, the Company accounts for individual products and services separately if they are distinct (i.e. if a product or service is separately identifiable from other items and a customer can benefit from it) or the multiple services are rendered in different reporting periods. The consideration received is allocated based on

#### Notes to financial statements

#### For the year ended 31 December 2024

their relative stand-alone selling prices which are determined based on the price list at which the Company sells the products and services in separate transactions.

Interest

Interest income is recognized in profit or loss as it accrues.

### (s) Finance costs

Interest expenses and similar costs are charged to profit or loss for the period in which they are incurred, except to the extent that they are capitalised as being directly attributable to the acquisition, construction or production of an asset which necessarily takes a substantial year of time to be prepared for its intended use or sale. The interest component of finance lease payments is recognised in the statement of comprehensive income using the effective interest rate method.

#### (t) Income tax

Income tax expense for the year comprises current and deferred tax. Current and deferred tax are recognised in profit or loss except to the extent that they relate to a business combination, or items recognised directly in equity or in other comprehensive income.

### Current income tax

Current income tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

#### Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which The Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

In determining the amount of current and deferred tax, the Company takes into account the impact of uncertain tax positions and whether additional taxes and interest may be due. The Company believes that its accruals for tax liabilities are adequate for all open tax years based on its assessment of many factors, including interpretations of tax law and prior experience. This assessment relies on estimates and assumptions and may involve a series of judgements about future events. New information may become available that causes the Company to change its

#### Notes to financial statements

### For the year ended 31 December 2024

judgement regarding the adequacy of existing tax liabilities; such changes to tax liabilities will impact tax expense in the period that such a determination is made.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised. Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that the related tax benefit will be realised.

#### (u) Basic earnings per share

The Company presents basic earnings per share (EPS) data for its ordinary shares. Basic earnings per share is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the year.

#### (v) Segment reporting

Segment results that are reported to the Company's CEO (the chief operating decision maker) include items directly attributable to a segment as well as those that can be allocated on a reasonable basis.

Unallocated items comprise mainly primarily the company's headquarters assets, liabilities and head office revenues and expenses and tax assets and tax liabilities.

### 4 Related person or parties

For the purposes of these financial statements, parties are considered to be related to the Company if the Company has the ability, directly or indirectly, to control or joint control the party or exercise significant influence over the party in making financial and operating decisions, or vice versa, or where the Company and the party are subject to common control or common significant influence. Related parties may be individuals or other entities.

# Notes to financial statements

| Less: Current provisions for employee benefit | 17,750                       | -         |
| Employee benefit obligations as December 31,  | 35,644                       | 54,093    |

### Actuarial assumptions

Principal actuarial assumptions at the reporting date (expressed as weighted averages method):

|                              | 2024            | 2023            |
|------------------------------|-----------------|-----------------|
|                              |                 | (%)             |
| Discount rate                | 2.59            | 2.59            |
| Future salary increases rate | 1.47-4.00       | 1.47-4.00       |
| Turnover rate                | 0-52            | 0-52            |
| Mortality rate               | 5.00 of TMO2017 | 5.00 of TMO2017 |

#### Notes to financial statements

### For the year ended 31 December 2024

#### Sensitivity analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below.

|   | (Unit: Thousand Bah |          |
|---|---------------------|----------|
| Defined benefit obligation as at 31 December 2024 | Increase            | Decrease |
| Discount rate (1% movement)                       | (3,148)             | 3,609    |
| Future salary growth rate (1% movement)           | 4,067               | (3,618)  |
| Turnover rate (1% movement)                       | (3,360)             | 1,002    |
| Defined benefit obligation as at 31 December 2023 | Increase            | Decrease |
| Discount rate (1% movement)                       | (2,816)             | 3,230    |
| Future salary growth rate (1% movement)           | 3,155               | (2,808)  |
| Turnover rate (1% movement)                       | (3,006)             | 914      |

Although the analysis does not take account of the full distribution of cash flows expected under the plan, it does provide an approximation of the sensitivity of the assumptions shown.

#### 22 Legal Reserve

According to the Public Limited Companies Act B.E. 2535, the Company is required to set aside a statutory reserve at least 5 percent of its net profit after deducting accumulated deficit brought forward (if any) until the reserve reaches 10 percent of the registered share capital. The statutory reserve could not be used for dividend payment.

#### 23 Other income

Other revenues comprised of details as followed:

#### Notes to financial statements

#### For the year ended 31 December 2024

#### 24 Segment information

The Company has two reportable segments, as described below, which are the Company's strategic divisions. The strategic divisions offer different products and services, and are managed separately. For each of the strategic divisions, the chief operating decision maker (CODM) reviews internal management reports on at least a quarterly basis. The following summary describes the operations in each of the Company's reportable segments.

- Segment 1 Sale of goods and service
- Segment 2 Construction

Information regarding the results of each reportable segment is included below. Performance is measured based on segment profit before tax, as included in the internal management reports that are reviewed by the Company 's CODM. Segment profit before tax is used to measure performance as management believes that such information is the most relevant in evaluating the results of certain segments relative to other entities that operate within these industries.

- Exemption from the payment of import duty on imported goods with the re-export condition for a period of 1 year from the first import date.

As promoted company, the Company must comply with certain terms and conditions prescribed in the promotional certificate.

#### 35 Financial instruments

#### 35.1 Financial risk management objectives and policies

The Company financial instruments-principally comprise cash and cash equivalents, trade and other receivables, other financial assets, trade and other payables and lease liabilities. The financial risks associated with these financial instruments and how they are managed is described below.

Notes to financial statements

For the year ended 31 December 2024

Credit risk

The Company is exposed to credit risk primarily with respect to trade and other receivables, deposits with banks and other financial instruments. Except for derivative financial instruments, the maximum exposure to credit risk

is limited to the carrying amounts as stated in the statement of financial position.

Trade and other receivables

The Group manages the risk by adopting appropriate credit control policies and procedures and therefore does not

expect to incur material financial losses. Outstanding trade receivables are regularly monitored and any shipments

to major customers are covered by credit insurance obtained from the banks. In addition, the Company does not

have high concentrations of credit risk since it has a large customer base.

An impairment analysis is performed at each reporting date to measure expected credit losses. The provision for

expected credit losses rates are based on days past due for groupings of various customer segments with similar

credit risks. The calculation reflects the reasonable and supportable information that is available at the reporting

date about past events, current conditions and forecasts of future economic conditions. Generally, trade and other

receivables are written-off in accordance with the Company's policy.

Market risk

Interest rate risk

The Group exposure to interest rate risk relate primarily to their deposits at bank, other financial assets, long-term

loans and lease liabilities. Most of the Company's financial assets and liabilities bear floating interest rates or

fixed interest rates which are close to the market rate.

As at 31 December 2024, significant financial assets and liabilities classified by type of interest rate are

summarised in the table below, with those financial assets and liabilities that carry fixed interest rates further

classified based on the maturity date, or the repricing date if this occurs before the maturity date.
